Absorption of Radiation (see **Optical Properties; Radiation**)

Acoustics

Detection of directional neutron damage in Si by means of ultrasonic double refraction measurements, Rohn Truell, L. J. Teutonico, and Paul W. Levy—1723

Mechanism for ultrasonic attenuation in *n*-type Ge and Si, F. J. Blatt—1118 (L)

Adsorption (see **Gases**)

Aerodynamics (see **Fluid Dynamics**)

Afterglow (see **Electrical Discharges**)

Alloys (see **Crystalline State**)

Annihilation (see **Electrons and Positrons**)

Antiferroelectric Phenomena (see **Dielectrics and Dielectric Properties**)

Antiferromagnetism (see **Magnetic Properties**)

Antineutrinos (see **Neutrinos and Antineutrinos**)

Antineutrons (see **Elementary Particle Interactions**)

Antiprotons (see **Elementary Particle Interactions**)

Arcs (see **Electrical Discharges**)

Astrophysics

Crucial experiment concerning origin of meteorites, S. F. Singer—765

Distribution, production rate, and possible solar origin of natural tritium, Harmon Craig—1125(L)

Atmosphere (see **Geophysics**)

Atomic and Molecular Beams

Experimental limit for electron-proton charge difference, Vernon W. Hughes—170

Hfs of Cu^{63} and Cu^{65}, Y. Ting and H. Lew—581

Isotope shift in spectrum of In I, D. A. Jackson—1925(L)

Magnetic moments and hfs anomalies of Cs^{133}, Cs^{134}, Cs^{135}, and Cs^{137}, H. H. Stroke, V. Jaccarino, D. S. Edmonds, Jr., and R. Weiss—590

Odd-odd isotope having zero spin, J. C. Hubbs, W. A. Nierenberg, H. A. Shugart, and J. L. Worcester—1928 (L)

Atomic Mass and Abundance

Atomic masses in region Xe to Eu, W. H. Johnson, Jr., and A. O. Nier—1014

Atomic masses in S—Ti region from precision *Q*-value measurements, P. M. Endt, W. W. Buechner, C. M. Braams, C. H. Paris, and A. Sperduto—1002

Distribution, production rate, and possible solar origin of natural tritium, Harmon Craig—1125(L)

Mass spectrometric investigation of rare earth elements for existence of new stable isotopes, T. L. Collins, F. M. Rourke, and F. A. White—196

New nuclear reactions induced by 2-Mev Li ions: masses of B^{10} and C^{15}, E. Norbeck, Jr.—204

Atomic Structure and Spectra

Contribution to Lamb shift due to finite proton size, Walter Aron and A. J. Zuchelli—1681(L)

Effect of atomic core on nuclear quadrupole coupling, R. M. Sternheimer—158

Electron *g*-value in ground state of deuterium, J. S. Geiger, V. W. Hughes, and H. E. Radford—183

Extension of Thomas-Fermi-Dirac statistical theory of atom to finite temperatures, R. D. Cowan and J. Ashkin —144

He atom ground state, Toichiro Kinoshita—1490

Hfs of Cu^{63} and Cu^{65}, Y. Ting and H. Lew—581

Isotope shift in spectrum of In I, D. A. Jackson—1925(L)

Isotope shifts in spectra of Sr, R. H. Hughes—1260

Magnetic moments and hfs anomalies of Cs^{133}, Cs^{134}, Cs^{135}, and Cs^{137}, H. H. Stroke, V. Jaccarino, D. S. Edmonds, Jr., and R. Weiss—590

Atomic Structure and Spectra (Continued)
Measurement of fine structure separation $3^3P_1-3^3P_2$ for He atom, W. E. Lamb, Jr., and T. H. Maiman—573
Mesonic atoms: radiative yields of μ-meson K and L series and effect of meson capture in chemical compounds, Mary Beth Stearns and Martin Stearns—1573
Microwave technique for determining fine structure of He atom, Willis E. Lamb, Jr.—559
Precision method for obtaining absolute values of atomic binding energies, Carl Nordling, Evelyn Sokolowski, and Kai Siegbahn—1676(L)
Quadrupole moments of Os^{189}, Ta^{181}, Lu^{176}, and La^{139}, Kiyoshi Murakawa and Tohru Kamei—671
Statistical theory of many-electron systems. General considerations pertaining to Thomas-Fermi theory, Sidney Golden—604
Theory of hfs, Charles Schwartz—173
Thermodynamic properties of mixtures on statistical model, J. J. Gilvarry and W. G. McMillan—579
X-ray spectra of Po atomic number 84, W. F. Peed, L. E. Burkhart, R. A. Staniforth, and L. G. Fauble—588

Compton Effect (see **Radiation**)
Conductivity, Electrical (see **Electrical Conductivity and Resistance**)
Conductivity, Thermal (see **Thermal Properties**)
Constants, Standards, Units
Accuracy of microwave resonant cavity measurements of velocity of light, Donald H. Janney—1138
Cosmic Radiation (see also **Mesons and Hyperons**)
Cosmic-ray bursts under Pb at sea level, Hugh Carmichael and John F. Steljes—1626
Crucial experiment concerning origin of meteorites, S. F. Singer—765
Evaluation of cascade angular and radial distributions from their moments, B. A. Chartres—707
Impact zones for solar cosmic-ray particles, R. Lüst—1827
Mass measurements of slow cosmic-ray mesons, M. Inoki, T. Yasaki, M. Machida, and Y. Matsukawa—1872
Nuclear size from cosmic-ray interactions, M. S. Sinha and N. C. Das—1587
Cosmology (see **Astrophysics; Relativity and Gravitation**)
Coulomb Excitation (see **Nuclear Reactions; Nuclear Spectra**)
Critical Potentials (see **Atomic Structure and Spectra; Molecular Structure and Spectra**)
Cross Section (see **Electrons and Positrons; Nuclear Reactions; Radiation; Scattering**)
Crystal Counters (see **Methods and Instruments**)

Crystalline State (see also **Electrical Properties; Imperfections in Solids; Magnetic Properties; Semiconductors; etc.**)
Absorption of light in α SiC near band edge, W. J. Choyke and Lyle Patrick—1721
Acoustic relaxation effect in Mn_3O_4, M. E. Fine and Charles Chieu—121
Anisotropic relaxation peak in internal friction of crystalline quartz, John H. Wasilik—1174
Approximate wave functions for F-center, and their application to electron spin resonance problem, Barry S. Gourary and Frank J. Adrian—1180
Calculation of band structure of "complex" crystals, B. Segall—108
Color centers in x-rayed KI, Herbert N. Hersh—1158
Critical points and lattice vibration spectra, James C. Phillips—1933(E)
Disordered one-dimensional crystals, Helmut Schmidt—425
Effect of free ends on vibration frequencies of one-dimensional lattices, Richard F. Wallis—540
Effect of isotopes on low-temperature thermal conductivity, Glen A. Slack—829
Effective-mass theory in solids from many-particle standpoint, W. Kohn—509
Elastic moduli of diamond, H. J. McSkimin and W. L. Bond—116
Electronic band structure of Se and Te, John R. Reitz—1233
Electronic structure of F-centers in KCl by electron spin double-resonance technique, G. Feher—1122(L)
General theorems on equivalence of group velocity and energy transport, M. A. Biot—1129
Hfs of F-center spin resonance in LiF and NaF, Norman W. Lord—756(L)
Impurity-induced localized modes of lattice vibration in diatomic chain, Robert L. Bjork—456
Intensity distribution of x-ray diffraction pattern of finite crystal containing point defects, J. B. Sampson and C. W. Tucker, Jr.—1117(L)
K x-ray absorption spectrum of single crystal of Ge, D. G. Doran and S. T. Stephenson—1156
Lattice constants and Brillouin zone overlap in dilute Mg alloys, F. W. von Batchelder and R. F. Raeuchle—59
Magnetic structures in Cu-Mn alloys, David Meneghetti and S. S. Sidhu—130
Modified deformable potential for thermal scattering of electrons, John B. Gibson and Joseph M. Keller—476
Multipolar Stark splitting patterns in single crystals, Paul M. Parker—1713
Neutron diffraction study of orthorhombic $BaTiO_3$, G. Shirane, H. Danner, and R. Pepinsky—856
Nonradiative transitions of trapped electrons in polar crystals, J. J. O'Dwyer and P. G. Harper—399
Optical absorption band edge in anisotropic crystals, G. Dresselhaus—135
Optical absorption by Ag halides, Simpei Tutihasi—882
Orthogonalization procedures and localization of Wannier functions, B. C. Carlson and Joseph M. Keller—102
Paramagnetic resonance and optical absorption spectra of Cr^{3+} in MgO, W. Low—801
Paramagnetic resonance spectrum of Mn in cubic MgO and CaF_2, W. Low—793
Position of α and β bands in alkali-halide crystals, F. Bassani and N. Inchauspé—819
Possible interpretation of cyclotron resonance absorption in graphite, Benjamin Lax and H. J. Zeiger—1466
R-center production in alkali halides, G. R. Cole and R. J. Friauf—1464
Radiation damage experiments in III-V-compounds, U. Gonser and B. Okkerse—757(L)

Self-absorption in x-ray spectroscopy of valence electrons, H. P. Hanson and J. Herrera—1483
Sign of crystalline cubic field splitting parameter a in S state, W. Low—792
Some F-band optical oscillator strengths in additively colored alkali-halides, C. J. Rauch and C. V. Heer—914
Spectra of halogen solutions and V-bands in alkali halides, Herbert N. Hersh—1410(L)
Stacking disorders in Ni base magnetic alloys, R. D. Heidenreich and E. A. Nesbitt—1678(L)
Symmetry of low-temperature phase of $BaTiO_3$, Franco Jona and Ray Pepinsky—861
Theory of diamagnetism of Bloch electrons, T. Kjeldaas, Jr., and Walter Kohn—806
Thermal conductivity of KCl crystals containing Ca, Glen A. Slack—832
Thermal expansion of rare earth metals, F. Barson, S. Legvold, and F. H. Spedding—418
Thermal fluctuations in conductors, Nandor L. Balazs—896
Transport properties of dilute binary Mg alloys, Edward I. Salkovitz, Albert I. Schindler, and Erwin W. Kammer —887
Uv absorption and double x-ray reflections in diamond, B. S. Fraenkel, A. Halperin, and E. Alexander—1486
X-ray and neutron diffraction study of antiferroelectric $PbZrO_3$, F. Jona, G. Shirane, F. Mazzi, and R. Pepinsky —849

Diamagnetism (see **Magnetic Properties**)

Dielectrics and Dielectric Properties
Anisotropic relaxation peak in internal friction of crystalline quartz, John H. Wasilik—1174
Dependence of ratio of piezoelectric coefficients on density and composition of $BaTiO_3$ ceramics, Don Berlincourt and H. H. A. Krueger—56
Effect of pressure on Curie temperature of polycrystalline ceramic $BaTiO_3$, Hans Jaffe, Don Berlincourt, and J. M. KcKee—57
Elastoresistance constants of p-type InSb at 77°K, A. J. Tuzzolino—1411(L)
Infrared-absorption studies on $BaTiO_3$ and related materials, J. T. Last—1740
Neutron diffraction study of orthorhombic $BaTiO_3$, G. Shirane, H. Danner, and R. Pepinsky—856
New ferroelectric crystal containing no oxygen, R. Pepinsky and F. Jona—344(L)
Symmetry of low-temperature phase of $BaTiO_3$, Franco Jona and Ray Pepinsky—861
Temperature dependence of piezoresistance of high-purity Si and Ge, F. J. Morin, T. H. Geballe, and C. Herring —525
Thermodynamic theory of ferroelectric ceramics, H. G. Baerwald—480
X-ray and neutron diffraction study of antiferroelectric $PbZrO_3$, F. Jona, G. Shirane, F. Mazzi, and R. Pepinsky —849

Diffraction (see also **Scattering**)
Atomic distribution in liquid argon by neutron diffraction and cross sections of A^{36} and A^{40}, D. G. Henshaw—976
Incoherent neutron scattering by polycrystals, G. Placzek —1240
Magnetic structures in Cu-Mn alloys, David Meneghetti and S. S. Sidhu—130
Neutron diffraction study of orthorhombic $BaTiO_3$, G. Shirane, H. Danner, and R. Pepinsky—856
Symmetry of low-temperature phase of $BaTiO_3$, Franco Jona and Ray Pepinsky—861
Total neutron scattering in vitreous silica, R. J. Breen, R. M. Delaney, P. J. Persiani, and A. H. Weber—517
X-ray and neutron diffraction study of antiferroelectric $PbZrO_3$, F. Jona, G. Shirane, F. Mazzi, and R. Pepinsky —849

Diffusion
Anomalous isotope effect in metallic diffusion, David Lazarus and Boudewijn Okkerse—1677(L)
Diffusion and electrical behavior of Zn in Si, C. S. Fuller and F. J. Morin—379
Diffusion of Ag in AgBr and evidence for interstitialcy migration, Robert J. Friauf—843

Discharge of Electricity in Gases (see **Electrical Discharges**)

Disintegration and Excitation of Nucleus (see **Nuclear Reactions**)

Dynamics (see **Mechanics**)

Elasticity and Plasticity
Acoustic relaxation effect in Mn_3O_4, M. E. Fine and Charles Chieu—121
Anisotropic relaxation peak in internal friction of crystalline quartz, John H. Wasilik—1174
Elastic moduli of diamond, H. J. McSkimin and W. L. Bond—116

Electrical Breakdown (see **Dielectrics and Dielectric Properties; Electrical Discharges**)

Electrical Conductivity and Resistance (see also **Electrical Properties; Semiconductors; Superconductors**)
CdS-type photoconductivity in ZnTe crystals, Richard H. Bube and Edward L. Lind—1711
Elastoresistance constants of p-type InSb at 77°K, A. J. Tuzzolino—1411(L)
Electronic band structure of Se and Te, John R. Reitz—1233
Hall effect and resistance of dilute Au-Cr alloys at low temperatures, Werner B. Teutsch and William F. Love —487
Magnetoconductivity in p-type Ge, Colman Goldberg, E. N. Adams, and R. E. Davis—865
Microwave conductivity of ionized decaying plasma at low pressures, Aldo L. Gilardini and Sanborn C. Brown—2
Noise, time-constant, and Hall studies on PbS photoconductive films, Frances L. Lummis and Richard L. Petritz —502
Optical and electrical properties of AgCl, P. G. Aline—406
Photoconductivity in PbSe: experimental, James N. Humphrey and Wayne W. Scanlon—469
Photoconductivity in PbSe: theory of dependence of sensitivity on film thickness and absorption coefficient, James N. Humphrey and Richard L. Petritz—1192
Photoconductivity of PbSe: theory of mechanism of sensitization, James N. Humphrey and Richard L. Petritz —1736
Resistance minimum in Mg: magnetoresistance, R. T. Webber—1437
Resistance minimum of Mg: electrical and thermal resistivities, D. A. Spohr and R. T. Webber—1427
Resistance minimum of Mg: electrical resistivity below 1°K, R. A. Hein and R. L. Falge—1433
Resistance minimum of Mg: heat capacity, J. K. Logan, J. R. Clement, and H. R. Jeffers—1435
Thermal fluctuations in conductors, Nandor L. Balazs—896
Transport properties of dilute binary Mg alloys, Edward I. Salkovitz, Albert I. Schindler, and Erwin W. Kammer —887

Electrical Discharges
Effect of variable ionic mobility on ambipolar diffusion, L. S. Frost—354
Experimental investigations of motion of plasma projected from button source across magnetic fields, E. G. Harris, R. B. Theus, and W. B. Bostick—46

Electrical Discharges (Continued)
Fields on plasma ions by collective coordinates, Arthur A. Broyles—347
Microplasmas in Si, D. J. Rose—413
Microwave conductivity of ionized decaying plasma at low pressures, Aldo L. Gilardini and Sanborn C. Brown—25
Microwave determination of probability of collision of electrons in Ne, Aldo L. Gilardini and Sanborn C. Brown—31
Moving striations, N. L. Oleson and A. W. Cooper—1411(L)
Moving striations in dc glow discharges, Harry S. Robertson—368
Townsend's first ionization coefficient in nitrogen, Melvin A. Harrison—366
Electrical Properties (see also **Dielectrics and Dielectric Properties; Electrical Conductivity and Resistance; Semiconductors; Superconductors**)
Field effect on illuminated Ge surface and investigation of surface recombination process, Shyh Wang and George Wallis—1459
Theory of sputtering process, Don E. Harrison, Jr.—1202
Transport properties of dilute binary Mg alloys, Edward I. Salkovitz, Albert I. Schindler, and Erwin W. Kammer—887
Electrodynamics (see **Electromagnetic Theory and Electrodynamics**)
Electroluminescence (see **Luminescence**)
Electrolysis (see **Chemical Effects and Properties**)
Electromagnetic Theory and Electrodynamics (see also **Microwaves**)
General theorems on equivalence of group velocity and energy transport, M. A. Biot—1129
Particle aspect of electromagnetic field equations, R. H. Good, Jr.—1914
Electron Diffraction (see **Diffraction; Scattering of Electrons and Positrons**)
Electron Optics (see **Electromagnetic Theory and Electrodynamics**)
Electronic Tubes (see **Methods and Instruments**)
Electrons and Positrons (see also **Electromagnetic Theory and Electrodynamics; Elementary Particle Interactions; Scattering of Electrons and Positrons**)
Radiative corrections to pair annihilation, Isadore Harris and Laurie M. Brown—1656
Electrons, Mobility (see **Ions and Electrons, Mobility**)
Electrons, Scattering of (see **Scattering of Electrons and Positrons**)
Electrons, Secondary (see **Electrical Properties**)
Electrons, Thermionic (see **Electrical Properties**)
Electro-Optical Effects (see **Optical Properties**)
Electrostriction (see **Dielectrics and Dielectric Properties**)
Elementary Particle Interactions
Angular distributions of positrons from $\pi^+-\mu^+-e^+$ decays observed in liquid hydrogen bubble chamber, A. Abashian, R. K. Adair, R. Cool, A. Erwin, J. Kopp, L. Leipuner, T. W. Morris, D. C. Rahm, R. R. Rau, A. M. Thorndike, W. L. Whittemore, and W. J. Willis—1927(L)
Antineutrino disintegration of deuteron, Joseph Weneser—1335
Antiproton-nucleon annihilation process (antiproton collaboration experiment), W. H. Barkas, R. W. Birge, W. W. Chupp, A. G. Ekspong, G. Goldhaber, S. Goldhaber, H. H. Heckman, D. H. Perkins, J. Sandweiss, E. Segrè, F. M. Smith, D. H. Stork, L. van Rossum, E. Amaldi, G. Baroni, C. Castagnoli, C. Franzinetti, and A. Manfredini—1037
Calculation of phenomenological nucleon-nucleon potentials, J. L. Gammel, R. S. Christian, and R. M. Thaler—311
Catalysis of nuclear reactions by μ mesons, L. W. Alvarez, H. Bradner, F. S. Crawford, Jr., J. A. Crawford, P. Falk-Vairant, M. L. Good, J. D. Gow, A. H. Rosenfeld, F. Solmitz, M. L. Stevenson, H. K. Ticho, and R. D. Tripp—1127(L)
Chew-Low formalism for two interactions, S. D. Drell and F. Zachariasen—1407
Cloud chamber investigation of anomalous θ^0 particles, J. A. Kadyk, G. H. Trilling, R. B. Leighton, and C. D. Anderson—1862
Decay of charged K-mesons, R. Arnowitt and W. B. Teutsch—285
Derivation of dispersion relations for forward scattering, Kurt Symanzik—743
Electron scattering by deuteron, Roger G. Newton—763(L)
Experimental test of parity conservation in β decay, C. S. Wu, E. Ambler, R. W. Hayward, D. D. Hoppes, and R. P. Hudson—1413(L)
Experiments with 315-Mev polarized protons: p-p and p-n scattering, O. Chamberlain, E. Segrè, R. D. Tripp, C. Wiegand, and T. Ypsilantis—288
Interactions of 85-Mev positive pions with deuterons, Kenneth C. Rogers and Leon M. Lederman—247
Isobaric nucleon model for pion production in nucleon-nucleon collisions, S. J. Lindenbaum and R. M. Sternheimer—1874
Isotopic spin and antinucleon-nucleon scattering, B. J. Malenka and H. Primakoff—338
K^+ production in p-p collisions at 3.0 Bev, S. J. Lindenbaum and Luke C. L. Yuan—1931(L)
Measurement of radiative correction to electron-proton scattering by observation of absolute cross section, George W. Tautfest and W. K. H. Panofsky—1356
Meson-nucleon scattering in Tamm-Dancoff method, Katsumi Tanaka—1109
Meson production in π-p collisions at Cosmotron energies, W. A. Wallenmeyer—1058
Negative to positive ratio from nonrelativistic theories of pion photoproduction, Michael J. Moravcsik—267; 1933(E)
Nonradiative absorption of positive pions by deuterons at 118 Mev, Charles Erwin Cohn—1582
Nuclear emulsion evidence for parity nonconservation in decay chain $\pi^+-\mu^+-e^+$, Jerome I. Friedman and V. L. Telegdi—1681(L)
Nucleon structure in static theory, George Salzman—1076
Observations of failure of conservation of parity and charge conjugation in meson decays: magnetic moment of free muon, Richard L. Garwin, Leon M. Lederman, and Marcel Weinrich—1415(L)
Pair production of s-wave π mesons, Adam M. Bincer—1399
Parity nonconservation and two-component theory of neutrino, T. D. Lee and C. N. Yang—1671
Phase-shift analysis of 310-Mev proton-proton scattering experiments, H. P. Stapp, T. J. Ypsilantis, and N. Metropolis—302
Phase space calculations, G. E. A. Fialho—328
Photoproduction of charged mesons from deuterons, S. Penner—1113
Photoproduction of π^0 mesons in hydrogen, L. J. Koester, Jr., and F. E. Mills—1900
Photoproduction of pion pairs in hydrogen, R. M. Friedman and K. M. Crowe—1369
Pion-deuteron scattering in impulse approximation, Ronald M. Rockmore—256
Pion production by inelastic scattering of electrons in hydrogen, G. B. Yodh and W. K. H. Panofsky—731

Pion production in electron-proton collisions, R. H. Dalitz and D. R. Yennie—1598
Pion production in nucleon-nucleon collisions at energies near threshold, D. B. Lichtenberg—1084
Pion production in pion-nucleon scattering, Jerrold Franklin—1101
Pion-proton scattering at 220 Mev, J. Ashkin, J. P. Blaser, F. Feiner, and M. O. Stern—724
Regeneration of θ_1^0 mesons by magnetic field, Myron L. Good—1120(L)
Report on long-lived K^0 mesons, K. Lande, L. M. Lederman, and W. Chinowsky—1925(L)
Results from enriched negative K-meson beam, W. H. Barkas, W. F. Dudziak, P. C. Giles, H. H. Heckman, F. W. Inman, C. J. Mason, N. A. Nickols, and F. M. Smith—1417(L)
Scattering of K^+ particles from protons and deuterons, Jeremy Bernstein—1853
Scattering of 10–30 Mev negative pions by hydrogen, D. E. Nagle, R. H. Hildebrand, and R. J. Plano—718
Search for antiprotons, Donald H. Stork, Robert W. Birge, Roy P. Haddock, Leroy T. Kerth, Jack Sandweiss, and Marian N. Whitehead—729
Static model for production of strange particles, D. C. Peaslee—1034
Theory of p-wave pion-nucleon interaction, S. Fubini and W. E. Thirring—1382
Two-nucleon interaction at high energies and Lévy potential, H. Gelernter—1068

Elements (see **Atomic Mass and Abundance**)
Energy Loss of Particles (see **Range and Energy Loss**)
Energy States of Atoms (see **Atomic Structure and Spectra**)
Energy States of Molecules (see **Molecular Structure and Spectra**)
Energy States of Nucleus (see **Nuclear Reactions; Nuclear Spectra; Nuclear Structure Theory**)
Equations of State (see **Chemical Effects and Properties**)
Errata
Critical points and lattice vibration spectra, James C. Phillips—1933(E)
Electron scattering from deuteron, John A. McIntyre—1933(E)
Negative to positive ratio from nonrelativistic theories of pion photoproduction, Michael J. Moravcsik—1933(E)
Stopping power and valence states, Werner Brandt—1933(E)
Transport and deformation-potential theory for many-valley semiconductors with anisotropic scattering, Conyers Herring and Erich Vogt—1933(E)
Errors of Measurement (see **Methods and Instruments**)
Evaporation (see **Liquids**)
Excitation of Atoms (see **Atomic Structure and Spectra**)
Excitation of Molecules (see **Molecular Structure and Spectra**)
Excitation of Nucleus (see **Nuclear Reactions; Nuclear Spectra; Nuclear Structure Theory**)
Explosion Phenomena (see **Fluid Dynamics**)

Faraday Effect (see **Optical Properties**)
Ferroelectric Phenomena (see **Dielectrics and Dielectric Properties**)
Ferromagnetism (see **Magnetic Properties**)
Field Emission (see **Electrical Properties**)
Field Theory (see also **Quantum Electrodynamics**)
Chew-Low formalism for two interactions, S. D. Drell and F. Zachariasen—1407
Commutation relations of interacting spinor fields, Richard Spitzer—1919
Derivation of dispersion relations for forward scattering, Kurt Symanzik—743
Heisenberg operators in Lagrangian formalism, P. J. Redmond—1652
Isotopic spin and antinucleon-nucleon scattering, B. J. Malenka and H. Primakoff—338
Meson-nucleon scattering in Tamm-Dancoff method, Katsumi Tanaka—1109
Negative to positive ratio from nonrelativistic theories of pion photoproduction, Michael J. Moravcsik—267; 1933(E)
Nucleon structure in static theory, George Salzman—1076
Pair production of s-wave π mesons, Adam M. Bincer—1399
Parity nonconservation and two-component theory of neutrino, T. D. Lee and C. N. Yang—1671
Phenomenological approach to unified field theory, R. L. Arnowitt—735
Photoproduction of charged mesons from deuterons, S. Penner—1113
Pion production in nucleon-nucleon collisions at energies near threshold, D. B. Lichtenberg—1084
Pion production in pion-nucleon scattering, Jerrold Franklin—1101
Problem of ghost states in field theories, Kenneth W. Ford—320
Scattering of K^+ particles from protons and deuterons, Jeremy Bernstein—1853
Separable nonlocal potential and nuclear saturation, M. K. Sundaresan—1075
Static model for production of strange particles, D. C. Peaslee—1034
Strong coupling, A. Pais and R. Serber—1636
Theory of p-wave pion-nucleon interaction, S. Fubini and W. E. Thirring—1382
Two-nucleon interaction at high energies and Lévy potential, H. Gelernter—1068
Films, Properties
Ferromagnetic resonance in thin films of permalloy, P. E. Tannenwald and M. H. Seavey, Jr.—377
Noise, time-constant, and Hall studies on PbS photoconductive films, Frances L. Lummis and Richard L. Petritz—502
Photoconductivity in PbSe: experimental, James N. Humphrey and Wayne W. Scanlon—469
Photoconductivity in PbSe: theory of dependence of sensitivity on film thickness and absorption coefficient, James N. Humphrey and Richard L. Petritz—1192
Photoconductivity of PbSe: theory of mechanism of sensitization, James N. Humphrey and Richard L. Petritz—1736
Fine Structure (see **Atomic Structure and Spectra**)
Fission of Nucleus (see **Nuclear Fission**)
Fluctuation Phenomena (see **Noise**)
Fluid Dynamics
Energy equation of magneto-gas dynamics, Shih-I. Pai—1424
Hydrodynamics of oscillating disks in viscous fluids: density and viscosity of normal fluid in pure He^4 from 1.2°K to lambda point, J. G. Dash and R. Dean Taylor—7
Spectrum of turbulent fluctuations produced by convective mixing of gradients, Albert D. Wheelon—1706
Structure of shock front in argon, John W. Bond, Jr.—1683
Fluorescence (see **Luminescence**)
Friction (see **Mechanics**)

Galvanomagnetic Effect (see **Magnetic Properties**)
Gamma Rays (see also **Nuclear Reactions; Nuclear Spectra; Range and Energy Loss**)

Gases
Energy equation of magneto-gas dynamics, Shih-I. Pai—1424
Transport equation in quantum statistics for spinless molecules, A. W. Sáenz—546
Geophysics
Crucial experiment concerning origin of meteorites, S. F. Singer—765
Distribution, production rate, and possible solar origin of natural tritium, Harmon Craig—1125(L)
Spectrum of turbulent fluctuations produced by convective mixing of gradients, Albert D. Wheelon—1706

Imperfections in Solids (see also **Crystalline State; Electrical Conductivity and Resistance; Luminescence; Semiconductors**)
Acoustic relaxation effect in Mn_3O_4, M. E. Fine and Charles Chieu—121
Anisotropic relaxation peak in internal friction of crystalline quartz, John H. Wasilik—1174
Approximate wave functions for *F*-center, and their application to electron spin resonance problem, Barry S. Gourary and Frank J. Adrian—1180
CdS-type photoconductivity in ZnTe crystals, Richard H. Bube and Edward L. Lind—1711
Color centers in x-rayed KI, Herbert N. Hersh—1158
De-excitation of ZnS and ZnCdS phosphors by electric fields, Hartmut Kallmann and Peter Mark—1445
Detection of directional neutron damage in Si by means of ultrasonic double refraction measurements, Rohn Truell, L. J. Teutonico, and Paul W. Levy—1723
Diffusion of Ag in AgIr and evidence for interstitialcy migration, Robert J. Friauf—843
Electronic structure of *F*-centers in KCl by electron spin double-resonance technique, G. Feher—1122(L)
Emission and excitation spectra of Tl-activated KCl at low temperatures, David A. Patterson and Clifford C. Klick—401
Energy levels in electron-bombarded Si, G. K. Wertheim—1730
Hfs of *F*-center spin resonance in LiF and NaF, Norman W. Lord—756(L)
Intensity distribution of x-ray diffraction pattern of finite crystal containing point defects, J. B. Sampson and C. W. Tucker, Jr.—1117(L)
Low-field electroluminescence in insulating crystals of CdS, Roland W. Smith—900
Modified deformable potential for thermal scattering of electrons, John B. Gibson and Joseph M. Keller—476
Neutron specific color center in fused silica and impurity band of identical wavelength, Alvin J. Cohen—1151
Nonradiative transitions of trapped electrons in polar crystals, J. J. O'Dwyer and P. G. Harper—399
Optical absorption by Ag halides, Simpei Tutihasi—882
Photoconductivity in PbSe: experimental, James N. Humphrey and Wayne W. Scanlon—469
Photolytic behavior of AgCl, Nathan Wainfan—100
Photolytic darkening and electronic range in AgCl, Frederick C. Brown and Nathan Wainfan—93
Position of α and β bands in alkali-halide crystals, F. Bassani and N. Inchauspé—819
Possible mechanism for radiationless recombination in semiconductors, Leon Bess—1469
R-center production in alkali halides, G. R. Cole and R. J. Friauf—1464
Radiation damage experiments in III–V-compounds, U. Gonser and B. Okkerse—757(L)
Reflection spectrum and structure in exciton absorption peak of NaCl and KCl, P. L. Hartman, J. R. Nelson, and J. G. Siegfried—123
Some *F*-band optical oscillator strengths in additively colored alkali-halides, C. J. Rauch and C. V. Heer—914
Spectra of halogen solutions and *V*-bands in alkali halides, Herbert N. Hersh—1410(L)
Spontaneous radiative recombination in semiconductors, William P. Dumke—139
Stacking disorders in Ni base magnetic alloys, R. D. Heidenreich and E. A. Nesbitt—1678(L)
Thermal conductivity of KCl crystals containing Ca, Glen A. Slack—832
Inelastic Scattering (see **Nuclear Reactions; Scattering**)
Instruments (see **Methods and Instruments**)
Internal Conversion (see **Nuclear Spectra**)
Ionization (see also **Electrical Discharges; Range and Energy Loss of Particles**)

Liquids
Atomic distribution in liquid argon by neutron diffraction and cross sections of A^{36} and A^{40}, D. G. Henshaw—976
Luminescence
De-excitation of ZnS and ZnCdS phosphors by electric fields, Hartmut Kallmann and Peter Mark—1445
Electroluminescence of semiconducting diamond, R. Wolfe and J. Woods—921
Emission and excitation spectra of Tl-activated KCl at low temperatures, David A. Patterson and Clifford C. Klick—401
Fluorescence yields of Ni, Cu, Zn, and Pb, E. T. Patronis, Jr., C. H. Braden, and L. D. Wyly—681
K fluorescence yield of several metals, Charles E. Roos—931
Low-field electroluminescence in insulating crystals of CdS, Roland W. Smith—900
Luminescence of KI, K. J. Teegarden—1222
Optical and electrical properties of AgCl, P. G. Aline—406

Magnetic Fields (see **Electromagnetic Theory and Electrodynamics**)
Magnetic Properties
Criterion for uniform micromagnetization, William Fuller Brown, Jr.—1479
Effect of cavity on single-domain magnetic particle, William Fuller Brown, Jr., and A. H. Morrish—1198
Effect of interaction between magnetic particles on critical single-domain size, A. H. Morrish and L. A. K. Watt—1476
Ferrimagnetic resonance in yttrium iron garnet, J. F. Dillon, Jr.—759(L)
Ferromagnetic relaxation by exchange interaction between ferromagnetic electrons and conduction electrons, A. H. Mitchell—1439
Ferromagnetic resonance in metal single crystals, J. O. Artman—74
Ferromagnetic resonance in thin films of permalloy, P. E. Tannenwald and M. H. Seavey, Jr.—377
Magnetic structures in Cu-Mn alloys, David Meneghetti and S. S. Sidhu—130
Magnetic susceptibility of dilute alloys of Ni in Cu between 2.5°K and 295°K—814
Magnetostatic modes in ferromagnetic resonance, L. R. Walker—390
Microwave resonance relations in anisotropic single-crystal ferrites, J. O. Artman—62
New magnetic anisotropy, W. H. Meiklejohn and C. P. Bean—904
Stacking disorders in Ni base magnetic alloys, R. D. Heidenreich and E. A. Nesbitt—1678(L)
Theory of diamagnetism of Bloch electrons, T. Kjeldaas, Jr., and Walter Kohn—806
Magnetic Resonance (see also **Nuclear Moments and Spin**)
Approximate wave functions for *F*-center, and their application to electron spin resonance problem, Barry S. Gourary and Frank J. Adrian—1180
Classical Boltzmann theory of cyclotron resonance for warped surfaces, H. J. Zeiger, Benjamin Lax, and R. N. Dexter—495
Direct *l*-type doubling transitions in ClCN, Leonard Yarmus—928
Electron *g*-value in ground state of deuterium, J. S. Geiger, V. W. Hughes, and H. E. Radford—183
Electron spin relaxation times in gadolinium ethyl sulfate, G. Feher and H. E. D. Scovil—760(L)
Electronic structure of *F*-centers in KCl by electron spin double-resonance technique, G. Feher—1122(L)
Ferrimagnetic resonance in yttrium iron garnet, J. F. Dillon, Jr.—759(L)
Ferromagnetic relaxation by exchange interaction between ferromagnetic electrons and conduction electrons, A. H. Mitchell—1439
Ferromagnetic resonance in metal single crystals, J. O. Artman—74
Ferromagnetic resonance in thin films of permalloy, P. E. Tannenwald and M. H. Seavey, Jr.—377
Generalized theory of relaxation, F. Bloch—1206
Hfs of *F*-center spin resonance in LiF and NaF, Norman W. Lord—756(L)
Interband magneto-optic effects in semiconductors, E. Burstein and G. S. Picus—1123(L)
Magnetic moment and spin of $_{40}Zr_{91}^{91}$, E. Brun, J. Oeser, and H. H. Staub—1929(L)
Magnetic moments and hfs anomalies of Cs^{133}, Cs^{134}, Cs^{135}, and Cs^{137}, H. H. Stroke, V. Jaccarino, D. S. Edmonds, Jr., and R. Weiss—590
Magnetostatic modes in ferromagnetic resonance, L. R. Walker—390
Measurement of fine structure separation $3\,^3P_1$—$3\,^3P_2$ for He atom, W. E. Lamb, Jr., and T. H. Maiman—573
Microwave resonance relations in anisotropic single-crystal ferrites, J. O. Artman—62
Microwave technique for determining fine structure of He atom, Willis E. Lamb, Jr.—559
Modulation of light beam by precessing absorbing atoms, H. G. Dehmelt—1924(L)
Multipolar Stark splitting patterns in single crystals, Paul M. Parker—1713
Na nuclear quadrupole interactions in $NaClO_3$ and $NaBrO_3$, H. S. Gutowsky and G. A. Williams—464
Nuclear electric quadrupole moment of K^{39}, G. W. Series—1128(L)
Odd-odd isotope having zero spin, J. C. Hubbs, W. A. Nierenberg, H. A. Shugart, and J. L. Worcester—1928(L)
Operation of solid state maser, H. E. D. Scovil, G. Feher, and H. Seidel—762(L)
Paramagnetic resonance absorption in UCl_3 and nuclear spin, magnetic dipole moment, and electric quadrupole moment of U^{233}, Paul B. Dorain, Clyde A. Hutchison, Jr., and Eugene Wong—1307
Paramagnetic resonance and optical absorption spectra of Cr^{3+} in MgO, W. Low—801
Paramagnetic resonance of free radicals at millimeter wave frequencies, Arend van Roggen, Lien van Roggen, and Walter Gordy—50
Paramagnetic resonance spectrum of ammonium chromium alum, C. F. Davis, Jr., and M. W. P. Strandberg—447
Paramagnetic resonance spectrum of Cm, P. Fields, A. Friedman, B. Smaller, and W. Low—757(L)
Paramagnetic resonance spectrum of Mn in cubic MgO and CaF_2, W. Low—793
Possible interpretation of cyclotron resonance absorption in graphite, Benjamin Lax and H. J. Zeiger—1466
Quadrupole moments of Os^{189}, Ta^{181}, Lu^{175}, and La^{139}, Kiyoshi Murakawa and Tohru Kamei—671
Sign of crystalline cubic field splitting parameter *a* in *S* state, W. Low—792
Slow spin relaxation of optically polarized Na atoms, H. G. Dehmelt—1487

Mechanics, Quantum—Nuclear (see **Nuclear Structure Theory**)
Mechanics, Quantum—of Solid Bodies (see **Crystalline State**)
Mechanics, Statistical (see **Statistical Mechanics and Thermodynamics**)
Meson Field Theory (see **Field Theory**)
Mesons and Hyperons (see also **Cosmic Radiation; Elementary Particle Interactions; Nuclear Reactions Induced by Mesons; Scattering of Mesons**)
Angular correlations in K^0-decay processes, A. Pais and S. B. Treiman—1616
Angular distributions of positrons from $\pi^+-\mu^+-e^+$ decays observed in liquid hydrogen bubble chamber, A. Abashian, R. K. Adair, R. Cool, A. Erwin, J. Kopp, L. Leipuner, T. W. Morris, D. C. Rahm, R. R. Rau, A. M. Thorndike, W. L. Whittemore, and W. J. Willis—1927 (L)
Antiproton-nucleon annihilation process (antiproton collaboration experiment), W. H. Barkas, R. W. Birge, W. W. Chupp, A. G. Ekspong, G. Goldhaber, S. Goldhaber, H. H. Heckman, D. H. Perkins, J. Sandweiss, E. Segrè, F. M. Smith, D. H. Stork, L. van Rossum, E. Amaldi, G. Baroni, C. Castagnoli, C. Franzinetti, and A. Manfredini—1037
Charged pion production in Li, Edwin K. Gatchell—713
Cloud chamber investigation of anomalous θ^0 particles, J. A. Kadyk, G. H. Trilling, R. B. Leighton, and C. D. Anderson—1862
Decay of charged K-mesons, R. Arnowitt and W. B. Teutsch—285
Isobaric nucleon model for pion production in nucleon-nucleon collisions, S. J. Lindenbaum and R. M. Sternheimer—1874
K^+ production in p-p collisions at 3.0 Bev, S. J. Lindenbaum and Luke C. L. Yuan—1931 (L)
Lifetime of τ^+ meson, R. Motley and V. Fitch—265
Lifetimes of τ, $K_{\mu 3}$, and K_{e3} decay modes, T. F. Hoang, M. F. Kaplon, and G. Yekutieli—278
Magnetic moment of μ meson, A. Petermann—1931 (L); Hiroshi Suura and Eyvind H. Wichmann—1930 (L)
Mass measurements of slow cosmic-ray mesons, M. Inoki, T. Yasaki, M. Machida, and Y. Matsukawa—1872
Mass value for Σ^- hyperon, Stanley C. Freden and Harold K. Ticho—1121 (L)
Masses of identified positive heavy mesons, James Ray Peterson—693
Meson production in n-p collisions at Cosmotron energies, W. A. Wallenmeyer—1058
Mesonic atoms: radiative yields of μ-meson K and L series and effect of meson capture in chemical compounds, Mary Beth Stearns and Martin Stearns—1573
Negative to positive ratio from nonrelativistic theories of pion photoproduction, Michael J. Moravcsik—267; 1933 (E)
Nonmesonic decay of He^4 hyperfragment, A. G. Barkow and B. Chamany—692
Nonradiative absorption of positive pions by deuterons at 118 Mev, Charles Erwin Cohn—1582
Nuclear emulsion evidence for parity nonconservation in decay chain $\pi^+-\mu^+-e^+$, Jerome I. Friedman and V. L. Telegdi—1681 (L)
Observations of failure of conservation of parity and charge conjugation in meson decays: magnetic moment of free muon, Richard L. Garwin, Leon M. Lederman, and Marcel Weinrich—1415 (L)
Pair production of s-wave π mesons, Adam M. Bincer—1399
Parity nonconservation and two-component theory of neutrino, T. D. Lee and C. N. Yang—1671
Photoproduction of charged mesons from deuterons, S. Penner—1113
Photoproduction of π^0 mesons in hydrogen, L. J. Koester, Jr., and F. E. Mills—1900
Photoproduction of pion pairs in hydrogen, R. M. Friedman and K. M. Crowe—1369
Pion production by inelastic scattering of electrons in hydrogen, G. B. Yodh and W. K. H. Panofsky—731
Pion production in electron-proton collisions, R. H. Dalitz and D. R. Yennie—1598
Pion production in nucleon-nucleon collisions at energies near threshold, D. B. Lichtenberg—1084
Pion production in pion-nucleon scattering, Jerrold Franklin—1101
Production of photostars by bremsstrahlung of 250 to 500 Mev, Vincent Z. Peterson and Charles E. Roos—1620
Regeneration of θ_1^0 mesons by magnetic field, Myron L. Good—1120 (L)
Report on long-lived K^0 mesons, K. Lande, L. M. Lederman, and W. Chinowsky—1925 (L)
Results from enriched negative K-meson beam, W. H. Barkas, W. F. Dudziak, P. C. Giles, H. H. Heckman, F. W. Inman, C. J. Mason, N. A. Nickols, and F. M. Smith—1417 (L)
Search for antiprotons, Donald H. Stork, Robert W. Birge, Roy P. Haddock, Leroy T. Kerth, Jack Sandweiss, and Marian N. Whitehead—729
Static model for production of strange particles, D. C. Peaslee—1034
Z dependence of positive photopion production, W. S. C. Williams, K. M. Crowe, and R. M. Friedman—1840
Z dependence of positive pion production by 340-Mev protons, William Imhof, Harry T. Easterday, and Victor Perez-Mendez—1859
Metals (see **Crystalline State**)
Metastable Atoms (see **Atomic Structure and Spectra**)
Metastable Molecules (see **Molecular Structure and Spectra**)
Meteorology (see **Geophysics**)
Methods and Instruments
Bremsstrahlung measurements with Compton electron spectrometer, J. W. Robson and E. C. Gregg—619
Collection of ions produced by α particles in air, Catharine Wingate, W. Gross, and G. Failla—929
Microwave technique for determining fine structure of He atom, Willis E. Lamb, Jr.—559
Modulation of light beam by precessing absorbing atoms, H. G. Dehmelt—1924 (L)
Operation of solid state maser, H. E. D. Scovil, G. Feher, and H. Seidel—762 (L)

Precision method for obtaining absolute values of atomic binding energies, Carl Nordling, Evelyn Sokolowski, and Kai Siegbahn—1676(L)
Sources of error in experiments on reorientation effect in Coulomb excitation, G. Breit, R. L. Gluckstern, and J. E. Russell—1121(L)
Microwaves (see also **Atomic Structure and Spectra; Magnetic Resonance; Molecular Structure and Spectra; Nuclear Moments and Spin**)
Accuracy of microwave resonant cavity measurement of velocity of light, Donald H. Janney—1138
Microwave technique for determining fine structure of He atom, Willis E. Lamb, Jr.—559
Operation of solid state maser, H. E. D. Scovil, G. Feher, and H. Seidel—762(L)
Miscellaneous
Mobility of Ions and Electrons (see **Ions and Electrons, Mobility**)
Molecular Aggregates
Neutron specific color center in fused silica and impurity band of identical wavelength, Alvin J. Cohen—1151
Total neutron scattering in vitreous silica, R. J. Breen, R. M. Delaney, P. J. Persiani, and A. H. Weber—517
Molecular Beams (see **Atomic and Molecular Beams**)
Molecular Structure and Spectra
Direct *l*-type doubling transitions in ClCN, Leonard Yarmus—928
Microwave Stark effect measurement of dipole moment and polarizability of carbonyl sulfide, S. A. Marshall and J. Weber—1502
NO hfs theory: electronic structure, Masataka Mizushima—1262
Moments, Nuclear (see **Nuclear Moments and Spin**)
Moments of Molecules (see **Molecular Structure and Spectra**)

Neutrinos and Antineutrinos (see also **Nuclear Spectra; Radioactivity**)
Antineutrino disintegration of deuteron, Joseph Weneser—1335
Antineutrino flux from reactor, C. O. Muehlhause and S. Oleksa—1332
Electron-neutrino angular correlation in β decay of Ne^{19}, Myron L. Good and Eugene J. Lauer—213; W. Parker Alford and Donald R. Hamilton—673
Parity nonconservation and two-component theory of neutrino, T. D. Lee and C. N. Yang—1671
Neutron Diffraction (see **Diffraction; Scattering of Neutrons**)
Neutrons (see **Elementary Particle Interactions**)
Noise
Noise, time-constant, and Hall studies on PbS photoconductive films, Frances L. Lummis and Richard L. Petritz—502
Thermal fluctuations in conductors, Nandor L. Balazs—896
Nuclear Fission
Antineutrino flux from reactor, C. O. Muehlhause and S. Oleksa—1332
Correlations between neutron multiplicities and spontaneous fission modes of Cf^{252}, Donald A. Hicks, John Ise, Jr., Robert V. Pyle, Gregory Choppin, and Bernard Harvey—1507
Fission cross section of U^{235} for fast neutrons, B. C. Diven—1350
Low-energy activation functions for photofission of U^{235} and Th^{232}, R. A. Schmitt and R. B. Duffield—1277
Neutron emission from fission modes, R. B. Leachman and C. S. Kazek, Jr.—1511
Nuclear Forces (see **Elementary Particle Interactions; Field Theory; Nuclear Structure Theory**)
Nuclear Induction (see **Magnetic Resonance; Nuclear Moments and Spin**)
Nuclear Isomers (see **Nuclear Spectra; Radioactivity**)
Nuclear Moments and Spin
Effect of atomic core on nuclear quadrupole coupling, R. M. Sternheimer—158
Hfs of Cu^{63} and Cu^{65}, Y. Ting and H. Lew—581
Magnetic moment and spin of $_{40}Zr_{51}^{91}$, E. Brun, J. Oeser, and H. H. Staub—1929(L)
Magnetic moments and hfs anomalies of Cs^{133}, Cs^{134}, Cs^{135}, and Cs^{137}, H. H. Stroke, V. Jaccarino, D. S. Edmonds, Jr., and R. Weiss—590
Na nuclear quadrupole interactions in $NaClO_3$ and $NaBrO_3$, H. S. Gutowsky and G. A. Williams—464
Nuclear electric quadrupole moment of K^{39}, G. W. Series—1128(L)
Odd-odd isotope having zero spin, J. C. Hubbs, W. A. Nierenberg, H. A. Shugart, and J. L. Worcester—1928(L)
Paramagnetic resonance absorption in UCl_3 and nuclear spin, magnetic dipole moment, and electric quadrupole moment of U^{235}, Paul B. Dorain, Clyde A. Hutchison, Jr., and Eugene Wong—1307
Quadrupole moments of Os^{189}, Ta^{181}, Lu^{175}, and La^{139}, Kiyoshi Murakawa and Tohru Kamei—671
Theory of hfs, Charles Schwartz—173
Nuclear Photoeffects
Low-energy activation functions for photofission of U^{235} and Th^{232}, R. A. Schmitt and R. B. Duffield—1277
Negative to positive ratio from nonrelativistic theories of pion photoproduction, Michael J. Moravcsik—267; 1933(E)
Photoproduction of charged mesons from deuterons, S. Penner—1113
Photoproduction of π^0 mesons in hydrogen, L. J. Koester, Jr., and F. E. Mills—1900
Photoproduction of pion pairs in hydrogen, R. M. Friedman and K. M. Crowe—1369
Production of photostars by bremsstrahlung of 250 to 500 Mev, Vincent Z. Peterson and Charles E. Roos—1620
Relative yields of nuclear isomers of Br^{80} produced by (γ,n) reaction, A. M. King and A. F. Voigt—1310
Z dependence of positive photopion production, W. S. C. Williams, K. M. Crowe, and R. M. Friedman—1840
Nuclear Reactions, General (see also **Elementary Particle Interactions; Scattering**)
Angular momentum coupling in nuclear p shell, J. B. French and A. Fujii—652
Antineutrino disintegration of deuteron, Joseph Weneser—1335
Atomic masses in S—Ti region from precision Q-value measurements, P. M. Endt, W. W. Buechner, C. M. Braams, C. H. Paris, and A. Sperduto—1002
Electrodisintegration of Cu^{63} and Mn^{55}, R. L. Hines—1534
Electron effects on barrier penetration, Victor Erma—1784
New nuclear reactions induced by 2-Mev Li ions: masses of B^{10} and C^{12}, E. Norbeck, Jr.—204
Sources of error in experiments on reorientation effect in Coulomb excitation, G. Breit, R. L. Gluckstern, and J. E. Russell—1121(L)
Nuclear Reactions Induced by α Particles and He^3 (see also **Scattering of α Particles**)
α-particle bombardment of Mg isotopes, H. G. Graetzer and A. B. Robbins—1570
Analysis of angular distributions in $C^{13}(\alpha,n)O^{16}$ reaction, J. P. Schiffer, Alfred A. Kraus, Jr., and J. R. Risser—1811
Angular distribution of protons from α-particle bombard-

Nuclear Reactions Induced by α Particles and He^3 (Continued)
ment of B^{10}, Al^{27}, and P^{31}, P. von Herrmann and G. F. Pieper—1556
He^3-induced reactions on C^{12}, D. A. Bromley, E. Almqvist, H. E. Gove, A. E. Litherland, E. B. Paul, and A. J. Ferguson—957
Resolved neutrons from Be(α,n) reaction, J. R. Risser, J. E. Price, and C. M. Class—1288
Nuclear Reactions Induced by Deuterons and Tritons (see also **Scattering of Deuterons**)
Analysis of $B^{11}(d,n)C^{12}$ reaction by nuclear stripping, George E. Owen and L. Madansky—1766
Angular distribution and correlation studies of Be^9, B^{10}, and Mg^{24} (d,p) reactions, S. A. Cox and R. M. Williamson—1799
Angular momentum coupling in nuclear p shell, J. B. French and A. Fujii—652
B^{11} first excited state: possibility of spin-flip stripping, D. H. Wilkinson—666
Ca^{43} energy levels, C. M. Braams—1023
Deuteron-induced reactions from N^{14}, N^{15}, and He^4, E. K. Warburton and J. N. McGruer—639
Deuteron-induced reactions leading to N^{16}, Norman A. Bostrom, Emmett L. Hudspeth, and Ira L. Morgan—1545
Energy levels of Li^8 from various reactions, C. P. Browne and C. K. Bockelman—1301
N^{16} low-lying states, D. H. Wilkinson—686
O^{17} 870-kev level, F. S. Mozer and F. B. Hagedorn—1270
Nuclear Reactions Induced by Mesons and Hyperons (see also **Elementary Particle Interactions; Mesons and Hyperons; Scattering of Mesons and Hyperons**)
Catalysis of nuclear reactions by μ mesons, L. W. Alvarez, H. Bradner, F. S. Crawford, Jr., J. A. Crawford, P. Falk-Vairant, M. L. Good, J. D. Gow, A. H. Rosenfeld, F. Solmitz, M. L. Stevenson, H. K. Ticho, and R. D. Tripp—1127(L)
Interactions of 85-Mev positive pions with deuterons, Kenneth C. Rogers and Leon M. Lederman—247
Neutron production by μ-mesons stopped in Na and Mg, D. R. Jones—1591
Nonradiative absorption of positive pions by deuterons at 118 Mev, Charles Erwin Cohn—1582
Pair production of s-wave π mesons, Adam M. Bincer—1399
Results from enriched negative K-meson beam, W. H. Barkas, W. F. Dudziak, P. C. Giles, H. H. Heckman, F. W. Inman, C. J. Mason, N. A. Nickols, and F. M. Smith—1417(L)
Static model for production of strange particles, D. C. Peaslee—1034
Nuclear Reactions Induced by Neutrons (see also **Elementary Particle Interactions; Scattering of Neutrons**)
Atomic distribution in liquid argon by neutron diffraction and cross sections of A^{36} and A^{40}, D. G. Henshaw—976
Fission cross section of U^{235} for fast neutrons, B. C. Diven—1350
Low-lying levels in U^{238} excited by inelastic neutron scattering, Robert C. Allen—1796
Meson production in n-p collisions at Cosmotron energies, W. A. Wallenmeyer—1058
Neutron resonance structure of U^{235}, L. M. Bollinger, R. E. Coté, D. A. Dahlberg, and G. E. Thomas—661
Neutron resonances in kev region: heavier odd elements, H. W. Newson, J. H. Gibbons, H. Marshak, R. M. Williamson, R. Mobley, J. R. Patterson, and P. F. Nichols—198
Neutron transmission measurements and resonance parameters in Cd, F. B. Simpson and R. G. Fluharty—616
Pt^{200}—new radioisotope of platinum, L. P. Roy, Jean-Claude Roy, and Janet S. Merritt—1337
Total neutron cross sections of Be, C, F, Co, and Ge, R. O. Bondelid, K. L. Dunning, and F. L. Talbott—193
Nuclear Reactions Induced by Protons (see also **Elementary Particle Interactions; Scattering of Protons**)
Anomalous inelastic scattering of 23-Mev protons by heavy elements, Bernard L. Cohen—1549
B^{10} lifetime of first excited state, S. D. Bloom, C. M. Turner, and D. H. Wilkinson—232
Ca^{43} energy levels, C. M. Braams—1023
Charged pion production in Li, Edwin K. Gatchell—713
Differential cross sections for scattering of medium energy protons on carbon, Robert W. Peelle—1311
Energy levels of Li^8 from various reactions, C. P. Browne and C. K. Bockelman—1301
Inelastic proton scattering from Au at 6 Mev, B. Elbek and C. K. Bockelman—657
Inelastic scattering of 12-Mev protons on Li, C, Mg, and Si, Homer E. Conzett—1324
K^+ production in p-p collisions at 3.0 Bev, S. J. Lindenbaum and Luke C. L. Yuan—1931(L)
$N^{16}(p,\gamma)O^{16}$ reaction, D. H. Wilkinson and S. D. Bloom—683
(p,n) reactions in Mn^{55}, Co^{59}, Zn^{67}, and Zn^{68}, R. A. Chapman and J. C. Slattery—633
Radiative proton capture by C^{13}, H. B. Willard, J. K. Bair, H. O. Cohn, and J. D. Kington—202
Z dependence of positive pion production by 340-Mev protons, William Imhof, Harry T. Easterday, and Victor Perez-Mendez—1859
Nuclear Scattering (see **Scattering**)
Nuclear Spectra (see also **Nuclear Reactions; Radioactivity**)
Angular correlation measurements in decay of Hg^{197}, Horace H. Coburn, John V. Kane, and Sherman Frankel—1293
Attenuation of Am^{241} α-γ angular correlation in liquid film sources, V. E. Krohn, T. B. Novey, and S. Raboy—234
B^{10} lifetime of first excited state, S. D. Bloom, C. M. Turner, and D. H. Wilkinson—232
B^{11} first excited state: possibility of spin-flip stripping, D. H. Wilkinson—666
β decay and electron capture branching to levels of Pu^{239}, Jack M. Hollander—1518
Ca^{43} energy levels, C. M. Braams—1023
Configurational mixing in γ-decay theory, R. J. Blin-Stoyle and C. A. Caine—1810
Coulomb excitation of Br and Re, E. A. Wolicki, L. W. Fagg, and E. H. Geer—238
Decay properties of 74-sec Ag^{111m}, Ulrich L. Schindewolf, John W. Winchester, and Charles D. Coryell—1763
Electron-capture decay of Am^{239} and Am^{240}, W. G. Smith, W. M. Gibson, and J. M. Hollander—1514
Electron-neutrino angular correlation in β decay of Ne^{19}, Myron L. Good and Eugene J. Lauer—213; W. Parker Alford and Donald R. Hamilton—673
Energies of nuclei with different proton and neutron shells, S. Goldstein and I. Talmi—995
Energy levels of Li^8 from various reactions, C. P. Browne and C. K. Bockelman—1301
Experimental test of parity conservation in β decay, C. S. Wu, E. Ambler, R. W. Hayward, D. D. Hoppes, and R. P. Hudson—1413(L)
Fluorescence yields of Ni, Cu, Zn, and Pb, E. T. Patronis, Jr., C. H. Braden, and L. D. Wyly—681
Fm^{254} properties, Saadia Amiel—1412(L)
Ga^{69} energy levels from decay of Ge^{69}, Rudi H. Nussbaum and Sital K. Suri—1272
Ga^{70} disintegration, M. E. Bunker, J. P. Mize, and J. W. Starner—227

Internal bremsstrahlung from Pr^{142} and Pm^{147}, N. Starfelt and J. Cederlund—241
Internal conversion electrons following Coulomb excitation of highly deformed nuclei, E. M. Bernstein and H. W. Lewis—1524
Ir^{192} decay, Vincent Shiel, L. D. Wyly, and C. H. Braden—1521
Ir^{196} isomer, F. Boehm and P. Marmier—974
Low-lying levels in U^{235} excited by inelastic neutron scattering, Robert C. Allen—1796
$M1$ transition in Tl^{208}, A. de-Shalit—1531
N^{16} low-lying states, D. H. Wilkinson—686
Ne^{23} radioactive decay, J. R. Penning and F. H. Schmidt—647
O^{15} positron spectrum, O. C. Kistner, A. Schwarzschild, B. M. Rustad, and D. E. Alburger—1339
Parity nonconservation and two-component theory of neutrino, T. D. Lee and C. N. Yang—1671
Polarization of γ-rays in Ta^{181}, P. H. Stelson and F. K. McGowan—1346
Radiative proton capture by C^{13}, H. B. Willard, J. K. Bair, H. O. Cohn, and J. D. Kington—202
Re new neutron-deficient isotopes, B. C. Haldar and Edwin O. Wiig—1285
Sn^{125} decay (9.7-day and 9.4-minute), S. B. Burson, J. M. LeBlanc, and D. W. Martin—625
Sr^{92} (2.7-hr) decay, R. L. Heath—1011
Tm^{171} rotational states, Sven A. E. Johansson—189
W^{181} isomeric state, A. J. Bureau and C. L. Hammer—1006

Nuclear Structure Theory (see also **Nuclear Reactions; Nuclear Spectra**)

Angular momentum coupling in nuclear p shell, J. B. French and A. Fujii—652
Configurational mixing in β-decay theory, R. J. Blin-Stoyle and C. A. Caine—1810
Deformations of heavy nuclei, Osamu Miyatake, Yasukazu Yoshizawa, and Masao Toyama—1341
Energies of nuclei with different proton and neutron shells, S. Goldstein and I. Talmi—995
Energy of interacting Fermi systems, C. DeDominicis and P. C. Martin—1417(L)
Further refinements on Brillouin-Wigner perturbation procedure, E. Feenberg and P. Goldhammer—750
Interpretation of regularities in neutron and proton separation energies, A. de-Shalit—1528
Level density of system of Fermi particles, Norbert Rosenzweig—950
Li^6 level structure, Donald H. Lyons—936
$M1$ transition in Tl^{208}, A. de-Shalit—1531
Nuclear size from cosmic-ray interactions, M. S. Sinha and N. C. Das—1587
Nucleon structure in static theory, George Salzman—1076
Pairing effect in nuclei, Y. F. Bow—1541
Saturation of nuclear forces, C. DeDominicis and P. C. Martin—1419(L)
Self-consistent treatment of independent-particle central-field nuclear model, G. E. Tauber and Ta-You Wu—1772
Separable nonlocal potential and nuclear saturation, M. K. Sundaresan—1075
Shell model for positive-parity states of N^{16}, E. C. Halbert and J. B. French—1563
Solution of nuclear many-body problem, K. A. Brueckner and J. L. Gammel—1679(L)
Splitting of $^3S_1$ and $^1S_0$ states of Li^6, Taro Tamura—1808
Tensor coupling and vector shell model, Arnold M. Feingold—944

Optical Instruments (see **Methods and Instruments**)

Optical Properties (see also **Luminescence**)

Absorption of light in α SiC near band edge, W. J. Choyke and Lyle Patrick—1721
Approximate wave functions for F-center, and their application to electron spin resonance problem, Barry S. Gourary and Frank J. Adrian—1180
Color centers in x-rayed KI, Herbert N. Hersh—1158
Effect of impurities on free-hole infrared absorption in p-type Ge, R. Newman and W. W. Tyler—885
Electrical and optical properties of heat-treated Si, W. Kaiser—1751
Electronic band structure of Se and Te, John R. Reitz—1233
Emission and excitation spectra of Tl-activated KCl at low temperatures, David A. Patterson and Clifford C. Klick—401
Infrared-absorption studies on $BaTiO_3$ and related materials, J. T. Last—1740
Interband magneto-optic effects in semiconductors, E. Burstein and G. S. Picus—1123(L)
K x-ray absorption spectrum of single crystal of Ge, D. G. Doran and S. T. Stephenson—1156
Neutron specific color center in fused silica and impurity band of identical wavelength, Alvin J. Cohen—1151
Noise, time-constant, and Hall studies on PbS photoconductive films, Frances L. Lummis and Richard L. Petritz—502
Optical absorption band edge in anisotropic crystals, G. Dresselhaus—135
Optical absorption by Ag halides, Simpei Tutihasi—882
Optical and electrical properties of AgCl, P. G. Aline—406
Paramagnetic resonance and optical absorption spectra of Cr^{3+} in MgO, W. Low—801
Photoconductivity in PbSe: experimental, James N. Humphrey and Wayne W. Scanlon—469
Photoconductivity in PbSe: theory of dependence of sensitivity on film thickness and absorption coefficient, James N. Humphrey and Richard L. Petritz—1192
Photolytic behavior of AgCl, Nathan Wainfan—100
Photolytic darkening and electronic range in AgCl, Frederick C. Brown and Nathan Wainfan—93
Position of α and β bands in alkali-halide crystals, F. Bassani and N. Inchauspé—819
R-center production in alkali halides, G. R. Cole and R. J. Friauf—1464
Recombination radiation from deformed and alloyed Ge p-n junctions at 80°K, R. Newman—1715
Reflection spectrum and structure in exciton absorption peak of NaCl and KCl, P. L. Hartman, J. R. Nelson, and J. G. Siegfried—123
Self-absorption in x-ray spectroscopy of valence electrons, H. P. Hanson and J. Herrera—1483
Slow spin relaxation of optically polarized Na atoms, H. G. Dehmelt—1487
Some F-band optical oscillator strengths in additively colored alkali-halides, C. J. Rauch and C. V. Heer—914
Spectra of halogen solutions and V-bands in alkali halides, Herbert N. Hersh—1410(L)
Spectral distribution of photomagnetoelectric effect in semiconductors: theory, Wolfgang Gärtner—823
Spontaneous radiative recombination in semiconductors, William P. Dumke—139
"Thickness effect" in absorption spectra near absorption edges, L. G. Parratt, C. F. Hempstead, and E. L. Jossem—1228
Uv absorption and double x-ray reflections in diamond, B. S. Fraenkel, A. Halperin, and E. Alexander—1486

Quantum Electrodynamics (see also **Field Theory**)
Bremsstrahlung spectra corrected for multiple scattering in target, E. Hisdal—1821
Contribution to Lamb shift due to finite proton size, Walter Aron and A. J. Zuchelli—1681(L)
Higher-order radiative corrections to electron scattering, D. R. Yennie and H. Suura—1378
Magnetic moment of μ meson, A. Petermann—1931(L); Hiroshi Suura and Eyvind H. Wichmann—1930(L)
Particle aspect of electromagnetic field equations, R. H. Good, Jr.—1914
Proton bremsstrahlung, Behram Kurşunoğlu—1846
Radiative corrections to pair annihilation, Isadore Harris and Laurie M. Brown—1656
Quantum Mechanics
Density matrix and many-body problem, R. H. Tredgold—1421
Extension of Thomas-Fermi-Dirac statistical theory of atom to finite temperatures, R. D. Cowan and J. Ashkin—144
Further refinements on Brillouin-Wigner perturbation procedure, E. Feenberg and P. Goldhammer—750
He atom ground state, Toichiro Kinoshita—1490
Imperfect Bose gas with hard-sphere interactions, Kerson Huang, C. N. Yang, and J. M. Luttinger—776
Many-body problem in quantum mechanics and quantum statistical mechanics, T. D. Lee and C. N. Yang—1119(L)
Orthogonalization procedures and localization of Wannier functions, B. C. Carlson and Joseph M. Keller—102
Particle aspect of electromagnetic field equations, R. H. Good, Jr.—1914
Quantum mechanical many-body problem with hard-sphere interaction, Kerson Huang and C. N. Yang—767
Statistical theory of many-electron systems. General considerations pertaining to Thomas-Fermi theory, Sidney Golden—604
Quenching of Radiation (see **Radiation**)

Radar (see **Methods and Instruments; Radiation**)
Radiation (see also **Gamma Rays; Range and Energy Loss; X-Rays**)
Bremsstrahlung measurements with Compton electron spectrometer, J. W. Robson and E. C. Gregg—619
Bremsstrahlung spectra corrected for multiple scattering in target, T. Hisdal—1821
Computations of nonrelativistic electron bremsstrahlung, J. M. Berger—35
Nuclear scattering of 50- to 130-Mev γ rays, George E. Pugh, Ricardo Gomez, David H. Frisch, and G. Sargent Janes—982
Production of photostars by bremsstrahlung of 250 to 500 Mev, Vincent Z. Peterson and Charles E. Roos—1620
Proton bremsstrahlung, Behram Kurşunoğlu—1846
Spectrum of turbulent fluctuations produced by convective mixing of gradients, Albert D. Wheelon—1706
Radio Waves (see **Radiation**)
Radioactivity (see also **Nuclear Spectra**)
β decay and electron capture branching to levels of Pu^{239}, Jack M. Hollander—1518
Electron-capture decay of Am^{239} and Am^{240}, W. G. Smith, W. M. Gibson, and J. M. Hollander—1514
Electron effects on barrier penetration, Victor Erma—1784
Experimental test of parity conservation in β decay, C. S. Wu, E. Ambler, R. W. Hayward, D. D. Hoppes, and R. P. Hudson—1413(L)
Fm^{255} properties, Saadia Amiel—1412(L)
Half-lives of Sc^{46}, Cs^{134}, Ag^{110m}, Co^{60}, Zn^{65}, and $Eu^{152, 154}$, K. W. Geiger—1539
$M1$ transition in Tl^{205}, A. de-Shalit—1531
Possible existence of Cm^{247} or its daughters in nature, H. Diamond, A. M. Friedman, J. E. Gindler, and P. R. Fields—679
Pt^{190}—new radioisotope of platinum, L. P. Roy, Jean-Claude Roy, and Janet S. Merritt—1337
Re new neutron-deficient isotopes, B. C. Haldar and Edwin O. Wiig—1285
Raman Spectra (see **Molecular Structure and Spectra**)
Range and Energy Loss of Particles (see also **Scattering**)
Collection of ions produced by α particles in air, Catharine Wingate, W. Gross, and G. Failla—929
Electron capture by protons passing through H_2, Trilochan Pradhan—1250
Energy loss and straggling of 150-Mev electrons in Li, Be, C, and Al, A. M. Hudson—1
Range of 6- to 18-Mev protons in Be, Al, Cu, Ag, and Au, H. Bichsel, R. F. Mozley, and W. A. Aron—1788
Statistical fluctuations in energy losses of 37-Mev protons, T. J. Gooding and R. M. Eisberg—357
Stopping power and valence states, Werner Brandt—1933(E)
Recombination (see **Molecular Structure and Spectra**)
Rectifiers (see **Electrical Conductivity and Resistance; Semiconductors**)
Relativity and Gravitation
Invariant formulation of gravitational radiation theory, F. A. E. Pirani—1089
Linear and toroidal geons, Frederick J. Ernst, Jr.—1665
Phenomenological approach to unified field theory, R. L. Arnowitt—735
Variational calculations in geon theory, Frederick J. Ernst, Jr.—1662
Resistance, Electrical (see **Electrical Conductivity and Resistance**)
Resonance Radiation (see **Radiation**)

Scattering, General (see also **Diffraction; Elementary Particle Interactions; Nuclear Reactions; Range and Energy Loss of Particles**)
Application of formal scattering theory to many-body problems, L. L. Foldy and W. Tobocman—1099

Bremsstrahlung spectra corrected for multiple scattering in target, E. Hisdal—1821
Derivation of dispersion relations for forward scattering, Kurt Symanzik—743
Isotopic spin and antinucleon-nucleon scattering, B. J. Malenka and H. Primakoff—338
Multiple scattering by quantum mechanical systems, K. M. Watson—1388
Phase space calculations, G. E. A. Fialho—328
Scattering of nucleons by nuclei in 30-Mev region, L. R. B. Elton and L. C. Gomes—1027
Scattering of α Particles (see also **Nuclear Reactions Induced by α Particles and He^3**)
Scattering of Atoms and Molecules (see **Atomic and Molecular Beams**)
Scattering of Deuterons and Tritons (see also **Nuclear Reactions Induced by Deuterons and Tritons**)
Scattering of Electrons and Positrons (see also **Electrons and Positrons**)
Elastic scattering of low-energy electrons by atomic nitrogen and atomic oxygen, Lawrence Baylor Robinson —922
Electrodisintegration of Cu^{63} and Mn^{55}, R. L. Hines—1534
Electron scattering by deuteron, Roger G. Newton—763(L)
Electron scattering from deuteron, John A. McIntyre—1933(E)
Electron scattering from neighboring nuclei, Beat Hahn, Robert Hofstadter, and D. G. Ravenhall—1353
Energy loss and straggling of 150-Mev electrons in Li, Be, C, and Al, A. M. Hudson—1
Higher-order radiative corrections to electron scattering, D. R. Yennie and H. Suura—1378
Measurement of radiative correction to electron-proton scattering by observation of absolute cross section, George W. Tautfest and W. K. H. Panofsky—1356
Microwave determination of probability of collision of electrons in Ne, Aldo L. Gilardini and Sanborn C. Brown—31
Modified deformable potential for thermal scattering of electrons, John B. Gibson and Joseph M. Keller—476
Pion production by inelastic scattering of electrons in hydrogen, G. B. Yodh and W. K. H. Panofsky—731
Pion production in electron-proton collisions, R. H. Dalitz and D. R. Yennie—1598
Scattering of Mesons and Hyperons (see also **Mesons and Hyperons; Nuclear Reactions Induced by Mesons**)
Derivation of dispersion relations for forward scattering, Kurt Symanzik—743
Meson-nucleon scattering in Tamm-Dancoff method, Katsumi Tanaka—1109
Pion-deuteron scattering in impulse approximation, Ronald M. Rockmore—256
Pion production in pion-nucleon scattering, Jerrold Franklin—1101
Pion-proton scattering at 220 Mev, J. Ashkin, J. P. Blaser, F. Feiner, and M. O. Stern—724
Scattering of K^+ particles from protons and deuterons, Jeremy Bernstein—1853
Scattering of 10-30 Mev negative pions by hydrogen, D. E. Nagle, R. H. Hildebrand, and R. J. Plano—718
Theory of p-wave pion-nucleon interaction, S. Fubini and W. E. Thirring—1382
Scattering of Neutrons (see also **Nuclear Reactions Induced by Neutrons**)
Atomic distribution in liquid argon by neutron diffraction and cross sections of A^{36} and A^{40}, D. G. Henshaw—976
Incoherent neutron scattering by polycrystals, G. Placzek —1240
Low-lying levels in U^{238} excited by inelastic neutron scattering, Robert C. Allen—1796
n-d scattering at 2.45 and 3.27 Mev, John D. Seagrave and Lawrence Cranberg—1816
Thermal-neutron coherent scattering amplitudes of Tl and Os, LeRoy Heaton and S. S. Sidhu—216
Total neutron scattering in vitreous silica, R. J. Breen, R. M. Delaney, P. J. Persiani, and A. H. Weber—517
Scattering of Protons (see also **Nuclear Reactions Induced by Protons**)
Anomalous inelastic scattering of 23-Mev protons by heavy elements, Bernard L. Cohen—1549
Differential cross section measurements for elastic scattering of protons by N^{14}, C. R. Bolmgren, G. D. Freier, J. G. Likely, and K. F. Famularo—210
Differential cross sections for scattering of medium energy protons on carbon, Robert W. Peelle—1311
Elastic scattering of protons by N^{14}, F. B. Hagedorn, F. S. Mozer, T. S. Webb, W. A. Fowler, and C. C. Lauritsen —219
Electron capture by protons passing through H_2, Trilochan Pradhan—1250
Experiments with 315-Mev polarized protons: p-p and p-n scattering, O. Chamberlain, E. Segrè, R. D. Tripp, C. Wiegand, and T. Ypsilantis—288
Inelastic proton scattering from Au at 6 Mev, B. Elbek and C. K. Bockelman—657
Inelastic scattering of 12-Mev protons on Li, C, Mg, and Si, Homer E. Conzett—1324
Phase-shift analysis of 310-Mev p-p scattering experiments, H. P. Stapp, T. J. Ypsilantis, and N. Metropolis—302
Proton bremsstrahlung, Behram Kurşunoğlu—1846
Scattering of nucleons by nuclei in 30-Mev region, L. R. B. Elton and L. C. Gomes—1027
Scattering of Radiation (see **Gamma Rays; Radiation; X-Rays**)
Scintillation Counters (see **Methods and Instruments**)
Secondary Emission (see **Electrical Properties**)
Semiconductors
Absorption of light in α SiO near band edge, W. J. Choyke and Lyle Patrick—1721
Carrier lifetime in semiconductors for transient conditions, D. J. Sandiford—524
Classical Boltzmann theory of cyclotron resonance for warped surfaces, H. J. Zeiger, Benjamin Lax, and R. N. Dexter—495
Dc magnetoconductivity and energy band structure in semiconductors, R. M. Broudy and J. D. Venables—1757
Detection of directional neutron damage in Si by means of ultrasonic double refraction measurements, Rohn Truell, L. J. Teutonico, and Paul W. Levy—1723
Diffusion and electrical behavior of Zn in Si, C. S. Fuller and F. J. Morin—379
Effect of impurities on free-hole infrared absorption in p-type Ge, R. Newman and W. W. Tyler—885
Effective-mass theory in solids from many-particle standpoint, W. Kohn—509
Effective masses of electrons in InAs and InSb, R. J. Sladek—460
Effects of thick oxides on Ge surface properties, M. Lasser, C. Wysocki, and B. Bernstein—491
Elastoresistance constants of p-type InSb at 77°K, A. J. Tuzzolino—1411(L)
Electrical and optical properties of heat-treated Si, W. Kaiser—1751
Electroluminescence of semiconducting diamonds, R. Wolfe and J. Woods—921
Electron self-energy and temperature-dependent effective masses in semiconductors: n-type Ge and Si, H. D. Vasileff—441

Semiconductors (Continued)
Electronic band structure of Se and Te, John R. Reitz —1233
Energy levels in electron-bombarded Si, G. K. Wertheim —1730
Field effect on illuminated Ge surface and investigation of surface recombination process, Shyh Wang and George Wallis—1459
Formation of ion pairs and triplets between Li and Zn in Ge, F. J. Morin and Howard Reiss—384
Hall and drift mobilities: their ratio and temperature dependence in semiconductors, F. J. Blatt—1203
Hall and drift mobility in high-resistivity single-crystal Si, Donald C. Cronemeyer—522
Interband magneto-optic effects in semiconductors, E. Burstein and G. S. Picus—1123(L)
Ionization rates for holes and electrons in Si, S. L. Miller —1246
K x-ray absorption spectrum of single crystal of Ge, D. G. Doran and S. T. Stephenson—1156
Magnetoconductivity in *p*-type Ge, Colman Goldberg, E. N. Adams, and R. E. Davis—865
Mechanism for ultrasonic attenuation in *n*-type Ge and Si, F. J. Blatt—1118(L)
Microplasmas in Si, D. J. Rose—413
Noise, time-constant, and Hall studies on PbS photoconductive films, Frances L. Lummis and Richard L. Petritz —502
One-dimensional treatment of effective mass in semiconductors, I. Adawi—789
Photoconductivity in PbSe: experimental, James N. Humphrey and Wayne W. Scanlon—469
Photoconductivity of PbSe: theory of mechanism of sensitization, James N. Humphrey and Richard L. Petritz —1736
Possible interpretation of cyclotron resonance absorption in graphite, Benjamin Lax and H. J. Zeiger—1466
Possible mechanism for radiationless recombination in semiconductors, Leon Bess—1469
Properties of Au-doped Si, C. B. Collis, R. O. Carlson, and C. J. Gallagher—1168
Recombination radiation from deformed and alloyed Ge *p-n* junctions at 80°K, R. Newman—1715
Spectral distribution of photomagnetoelectric effect in semiconductors: theory, Wolfgang Gärtner—823
Spontaneous radiative recombination in semiconductors, William P. Dumke—139
Temperature dependence of piezoresistance of high-purity Si and Ge, F. J. Morin, T. H. Geballe, and C. Herring —525
Transport and deformation-potential theory for many-valley semiconductors with anisotropic scattering, Conyers Herring and Erich Vogt—1933(E)
Triple acceptors in Ge, H. H. Woodbury and W. W. Tyler—84
Shock Waves (see **Fluid Dynamics**)

Absorption coefficients for exciton absorption lines, G. Dresselhaus—76
Angular correlation of annihilation radiation from oriented graphite, S. Berko, R. E. Kelley, and J. S. Plaskett—824
Application of approximate F-center wave function. Magnetic hyperfine interactions in KCl, F. J. Adrian—1356(L)
Auger electrons in secondary electron spectrum in Mg, Otto H. Zinke—1163
Conduction band polarization in dilute alloys, Edward W. Hart—467
Contribution of core polarization to cohesive energies of alkali metals, Joseph Callaway—868
Elastic constants of LiF from 4.2°K to 300°K by ultrasonic methods, C. V. Briscoe and C. F. Squire—1175
Electrical resistivity of Au_3Cu at low temperatures, Hiroshi Sato—674
Electron-bombardment-induced dissociation of alkaline earth oxides, P. Wargo and W. G. Shepherd—694
Energy of formation of vacancies in Cu and Au, P. Jongenburger—66
Exchange and superexchange coupling between conduction electrons and d-electrons in magnetic materials, G. W. Pratt, Jr.—53
Inelastic scattering of slow neutrons by lattice vibrations in Al, R. S. Carter, H. Palevsky, and D. J. Hughes—1168
Intensities in inorganic complexes. Andrew D. Liehr and C. J. Ballhausen—1161
Lifetime of carriers in PbS crystals, Wayne W. Scanlon—718
Luminescence and symmetry properties of color centers, John Lambe and W. Dale Compton—684
M-center spin resonance and oscillator strength in LiF, Norman W. Lord—1100(L)
Neutron diffraction study of magnetic structures for perovskite-type mixed oxides $La(Mn,Cr)O_3$, U. H. Bents—225
Phonon free path in isotopic mixture, Daniel Charles Mattis—721
Precipitation of Cu in Ge, A. G. Tweet—221
Scattering of neutrons by spin waves in magnetite, B. N. Brockhouse—859
The g value in conduction electron spin resonance, Yako Yafet—679
Thermal inelastic scattering of cold neutrons in polycrystalline graphite, L. S. Kothari and K. S. Singwi—230
Thermodynamics for elastic solids. General formulation, Tsuan-Wu Ting and James C. M. Li—1165
Unified theory of interacting bosons, Eugene P. Gross—161(L)
Vacancy diffusion mechanism in ordered alloys, A. B. Lidiard—823(L)

Diamagnetism (see **Magnetic Properties**)
Dielectrics and Dielectric Properties
Diffraction (see also **Scattering**)
Diffraction of thermal waves in liquid He II, J. E. Mercereau and J. R. Pellam—1113
Inelastic scattering of slow neutrons by lattice vibrations in Al, R. S. Carter, H. Palevsky, and D. J. Hughes—1168
Neutron diffraction study of magnetic structures for perovskite-type mixed oxides $La(Mn,Cr)O_3$, U. H. Bents—225
Diffusion
Determination of coefficient of diffusion and frequency of ionization in microwave discharges, M. P. Madan, E. I. Gordon, S. J. Buchsbaum, and Sanborn C. Brown—839
Effect of heavy-doping on self-diffusion of Ge, M. W. Valenta and C. Ramasastry—73
Vacancy diffusion mechanism in ordered alloys, A. B. Lidiard—823(L)
Discharge of Electricity in Gases (see **Electrical Discharges**)
Disintegration and Excitation of Nucleus (see **Nuclear Reactions**)
Dynamics (see **Mechanics**)

Elasticity and Plasticity
Elastic constants of LiF from 4.2°K to 300°K by ultrasonic methods, C. V. Briscoe and C. F. Squire—1175
Thermodynamics for elastic solids. General formulation, Tsuan-Wu Ting and James C. M. Li—1165
Electrical Breakdown (see **Dielectrics and Dielectric Properties; Electrical Discharges**)
Electrical Conductivity and Resistance (see also **Electrical Properties; Semiconductors; Superconductors**)
Electrical resistivity of Au_3Cu at low temperature, Hiroshi Sato—674
Experiments on photomagnetoelectric effect in Ge, T. M. Buck and F. S. McKim—904
Investigation of photoconductive effect in PbS films using Hall and resistivity measurements, Joseph F. Woods—235
Opto-electronic properties of HgI_2, Richard H. Bube—703
Photoconduction in KBr and KI containing F centers, Nicolas Inchauspé—898

Electrical Conductivity and Resistance (Continued)
Primary photocurrent in CdS, P. J. van Heerden—468
Temperature dependence of electron-bombardment-induced conductivity in MgO, J. F. Marshall, M. A. Pomerantz, and R. A. Shatas—432
Thermal and electrical resistivity of Tl at low temperatures, Gaston Fischer, G. K. White, and S. B. Woods—480
Electrical Discharges
Clustering of negative ions in oxygen, D. S. Burch and R. Geballe—188
Determination of coefficient of diffusion and frequency of ionization in microwave discharges, M. P. Madan, E. I. Gordon, S. J. Buchsbaum, and Sanborn C. Brown—839
Experimental study of plasmoids, Winston H. Bostick—404
Growing electromagnetic waves, V. A. Bailey—1356(L)
Growth of current between parallel plates, P. M. Davidson—1
Ionic drift velocities and electron attachment coefficients in oxygen, D. S. Burch and R. Geballe—183
Leader stroke current in lightning discharge according to streamer theory, S. R. Khastgir—616
Limitations of microwave cavity method of measuring electron densities in plasma, K. B. Persson—191
Microwave measurements of high electron densities, S. J. Buchsbaum and Sanborn C. Brown—196
Oscillations of cylindrical plasma, Thomas H. Stix—1146
Recombination and afterglow in N_2 and O_2, R. B. Bryan, R. B. Holt, and O. Oldenburg—83
Similarity relations and cathode dark space, W. A. Gambling—203
Statistical mechanical theory of transport phenomena in fully ionized gas, Wesley E. Brittin—843
Electrical Properties (see also **Dielectrics and Dielectric Properties; Electrical Conductivity and Resistance; Semiconductors; Superconductors**)
Auger electrons in secondary electron spectrum in Mg, Otto H. Zinke—1163
Electrical properties of $BaTiO_3$ containing Sm, George G. Harman—1358(L)
Electron-bombardment-induced dissociation of alkaline earth oxides, P. Wargo and W. G. Shepherd—694
Internal field emission in Si p-n junctions, A. G. Chynoweth and K. G. McKay—418
New collision theory of cathode sputtering of metals at low ion energies, Erich B. Henschke—737
Observation of acoustoelectric effect, Gabriel Weinreich and Harry G. White—1104(L)
Photoelectric emission from single-crystal KI, H. R. Philipp and E. A. Taft—671
Resonance potentials in thin films of KCl, Harold Jacobs, Irving N. Greenberg, Lister Goble, and Alexander Ramsa—921
Electrodynamics (see **Electromagnetic Theory and Electrodynamics**)
Electroluminescence (see **Luminescence**)
Electrolysis (see **Chemical Effects and Properties**)
Electromagnetic Theory and Electrodynamics (see also **Microwaves**)

Rotational magnetic moments of Li^6F and Li^7F, Allan M. Russell—1100(L)
Shift of center frequency of an ammonia inversion spectrum, I. Takahashi, T. Ogawa, M. Yamano, and A. Hirai—606(L)
Submillimeter wave spectroscopy: rotation-inversion transitions in ND_3, Gunnar Erlandsson and Walter Gordy—513
Moments, Nuclear (see **Nuclear Moments and Spin**)
Moments of Molecules (see **Molecular Structure and Spectra**)

Neutrinos and Antineutrinos (see also **Nuclear Spectra; Radioactivity**)
Circular polarization of bremsstrahlung from polarized electrons in Born approximation, Kirk W. McVoy—828(L)
Composite particles of zero mass, K. M. Case—1316
Energy dependence of asymmetry in β decay of polarized muons, D. Berley, T. Coffin, R. L. Garwin, L. M. Lederman, and M. Weinrich—835(L)
Evidence for circular polarization of bremsstrahlung produced by β rays, M. Goldhaber, L. Grodzins, and A. W. Sunyar—826(L)
Measurement of longitudinal polarization of positrons emitted by Na^{22}, Lorne A. Page and Milton Heinberg—1220
Parity nonconservation and theory of neutrino, James A. McLennan, Jr.—821
Polarization of electrons in muon decay and two-component theory of neutrino, Toichiro Kinoshita and Alberto Sirlin—1110(L)
Possible tests of time reversal invariance in β decay, J. D. Jackson, S. B. Treiman, and H. W. Wyld, Jr.—517
Test of neutrino-antineutrino identity, Clyde L. Cowan, Jr.—825(L)
Neutron Diffraction (see **Diffraction; Scattering of Neutrons**)
Neutrons (see **Elementary Particle Interactions**)
Noise
Excess noise in n-type Ge, James J. Brophy—675
Inherent noise of quantum mechanical amplifiers, M. W. P. Strandberg—617
Noise in molecular amplifier, M. W. Muller—8
Nuclear Fission
Photofission cross sections of U^{236}, U^{238}, Th^{232}, Bi^{209}, and Au^{197} at energies of 150 to 500 Mev, John A. Jungerman and Herbert M. Steiner—585.
Prediction of delayed-neutron precursors, G. R. Keepin—1359(L)
Pu^{242} fission modes, A. B. Smith, P. R. Fields, and A. M. Friedman—779
Nuclear Forces (see **Elementary Particle Interactions; Field Theory; Nuclear Structure Theory**)
Nuclear Induction (see **Magnetic Resonance; Nuclear Moments and Spin**)
Nuclear Isomers (see **Nuclear Spectra; Radioactivity**)
Nuclear Moments and Spin
Determination of sign of He^3 nuclear magnetic moment, Melvin P. Klein and Bert E. Holder—837(L)
Experiments on spin temperature, A. Abragam and W. G. Proctor—160(L)
γ ray anisotropy of Co^{60} nuclei polarized by paramagnetic resonance saturation, M. Abragam, R. W. Kedzie, and C. D. Jeffries—165(L)
Hfs of $5\,^2P_{\frac{1}{2}}$ state of In^{115} and In^{113}: hfs anomalies in stable isotopes of In, T. G. Eck, A. Lurio, and P. Kusch—954
Hfs of $5\,^2P_{\frac{1}{2}}$ state of In^{115} and In^{113}: octupole interactions in stable isotopes of In, T. G. Eck and P. Kusch—958
Hfs of T in ground state, A. G. Prodell and P. Kusch—87
Measurement of spin and gyromagnetic ratio of As^{76}, F. M. Pipkin and J. W. Culvahouse—1102(L)
Nuclear polarization and impurity-state spin relaxation processes in Si, David Pines, John Bardeen, and Charles P. Slichter—489
Paramagnetic resonance hfs of Np^{239}, M. Abraham, C. D. Jeffries, R. W. Kedzie, and J. C. Wallmann—1357(L)
Polarization of nuclei by resonance saturation in paramagnetic crystals, C. D. Jeffries—164(L)
Ratio of magnetic moments of In^{115} and In^{113}, Michael Rice and R. V. Pound—953
Theory of hfs, Charles Schwartz—1371(E)
Nuclear Photoeffects
Angular distribution of photopions from deuterium, D. C. Hagerman, K. M. Crowe, and R. M. Friedman—818
C^{13} photodisintegration, Barnett C. Cook—300
Final-state interactions in total cross section for deuteron photodisintegration, Jeremy Bernstein—791
Photodisintegration of He, M. L. Rustgi and J. S. Levinger—530
Photofission cross sections of U^{236}, U^{238}, Th^{232}, Bi^{209}, and Au^{197} at energies of 150 to 500 Mev, John A. Jungerman and Herbert M. Steiner—585
Photon self-absorption and scattering by 15.1-Mev level in C^{12}, Evans Hayward and E. G. Fuller—991
Sum rules for photodisintegration of H^3 and He^3, M. L. Rustgi—1256
Nuclear Reactions, General (see also **Elementary Particle Interactions; Scattering**)
Catalysis of nuclear reactions between H isotopes by μ^--mesons, J. D. Jackson—330
Collision matrix for rotational excitation in adiabatic approximation, David M. Chase—516
Direct nuclear reactions, S. T. Butler—272
Energy dependence of cross sections near threshold: neutral particles, William H. Guier and Robert W. Hart—296
External Coulomb fields in the Wigner-Eisenbud nuclear reaction theory, G. Breit and J. S. McIntosh—1246

Nuclear Reactions, General (Continued)
Neutron-transfer reactions from N bombardment of Be, C, O, Na, and $Mg^{24,25,26}$, M. L. Halbert, T. H. Handley, J. J. Pinajian, W. H. Webb, and A. Zucker—251
Nuclear Reactions Induced by α Particles and He^3 (see also **Scattering of α Particles**)
$C^{13}(He^3,\alpha)C^{12}$ angular distributions at 4.5 Mev, H. D. Holmgren, E. H. Geer, R. L. Johnston, and E. A. Wolicki—102
Differential cross section for $C^{13}(He^3,\alpha)C^{12}$ reaction at 2.00 Mev, H. D. Holmgren—100
Direct nuclear reactions, S. T. Butler—272
Fm^{250}, Fm^{251}, Fm^{252} production and properties, S. Amiel, A. Chetham-Strode, Jr., G. R. Choppin, A. Ghiorso, B. G. Harvey, L. W. Holm, and S. G. Thompson—553
Inelastic scattering of 40.2-Mev α Particles, G. Igo—256
Nuclear Reactions Induced by Deuterons and Tritons (see also **Scattering of Deuterons**)
Angular distributions of $B^{11}(d,n)C^{12}$ ground-state neutrons, Oakes Ames, George E. Owen, and C. D. Swartz—775
Neutron spectrum from T+t, S. J. Bame, Jr., and Wallace T. Leland—1257
Polarization in $H^3(d,p)H^3$ reaction, R. E. Segel and S. S. Hanna—536
Proton polarization in (d,p) reactions, J. Sawicki—172(L)
Nuclear Reactions Induced by Mesons and Hyperons (see also **Elementary Particle Interactions; Mesons and Hyperons; Scattering of Mesons and Hyperons**)
Catalysis of nuclear reactions between H isotopes by μ^--mesons, J. D. Jackson—330
Effect of exclusion principle of interaction of K mesons with nuclei, R. M. Sternheimer—1027
Mean life of K^- mesons and their cross section in hydrogen, Bruce Cork, Glen R. Lambertson, Oreste Piccioni, and William Wenzel—167(L)
Monte Carlo calculation of single pion production by pions, J. E. Crew, R. D. Hill, and L. S. Lavatelli—1051
Neutron production by μ-mesons which penetrate Pb, B. F. Stearns, D. R. Jones, J. K. dePagter, and R. D. Sard—1043
Pion-nucleon interactions, S. J. Lindenbaum and R. M. Sternheimer—1107(L)
Pion production in pion-nucleon collisions, Leonard S. Rodberg—1090
Nuclear Reactions Induced by Neutrons (see also **Elementary Particle Interactions; Scattering of Neutrons**)
$Al^{27}(n,\alpha)Na^{24}$ reaction induced by 14.8-Mev neutrons, I. Kumabe, E. Takekoshi, H. Ogata, Y. Tsuneoka, and S. Ōki—155
Cross section for $Be^9(n,\alpha)He^6$ reaction, P. H. Stelson and E. C. Campbell—1252
Cross-section measurement near 50 Bev, A. E. Brenner and Robert W. Williams—1020
$F^{19}(n,d)O^{18}$ reactions and energy levels of O^{18}, F. L. Ribe—767
Inelastic scattering of slow neutrons by lattice vibrations in Al, R. S. Carter, H. Palevsky, and D. J. Hughes—1168
Neutron resonances in kev region: odd-intermediate nuclei, Harvey Marshak and Henry W. Newson—110
(n,p) reaction for Au, R. A. Peck, Jr.—965
Study of $Al^{27}(n,p)Mg^{27}$ at 14 Mev, R. K. Haling, R. A. Peck, Jr., and H. P. Eubank—971
Nuclear Reactions Induced by Protons (see also **Elementary Particle Interactions; Scattering of Protons**)
Angular correlations in $F^{19}(p,\alpha\gamma)O^{16}$ reaction, H. J. Martin, W. A. Fowler, C. C. Lauritsen, and T. Lauritsen—1260
Angular distribution of γ rays following Coulomb excitation in even-even nuclei, F. K. McGowan and P. H. Stelson—522
Capture of protons in K^{39}, J. de Veiga Simão and J. P. F. Sellschop—98
Comparison of reactions $p+d\rightarrow H^3+\pi^+$, $p+d\rightarrow He^3+\pi^0$ as a test of charge independence, Kenneth C. Bandtel, Wilson J. Frank, and Burton J. Moyer—802
Cross-section measurement near 50 Bev, A. E. Brenner and Robert W. Williams—1020
Direct nuclear reactions, S. T. Butler—272
Energy levels in F^{18} from $O^{17}(p,\alpha)N^{14}$ reaction, Katarina Ahnlund—124
Energy levels in Na^{23} and Ne^{20}, W. W. Buechner and A. Sperduto—1008
γ rays from proton bombardment of N^{16}, S. Bashkin and R. R. Carlson—261
Inelastic proton scattering and (p,d) reactions in heavy elements, Bernard L. Cohen and Sigmund W. Mosko—995
Investigation of γ radiation produced by irradiating B^{10} with protons in energy range 0.7 to 3.0 Mev, S. E. Hunt, R. A. Pope, and W. W. Evans—1013
Neutron thresholds in $Co^{59}(p,n)Ni^{59}$ reaction, J. W. Butler, K. L. Dunning, and R. O. Bondelid—1224
Nuclear levels in Si^{28} and P^{31}, P. M. Endt and C. H. Paris—764
Polarized neutron beams, G. H. Stafford, S. Tornabene, and C. Whitehead—831(L)
Production of heavy mesons and hyperons by protons on deuterium via secondary pions, E. C. Fowler, H. D. Taft, and E. R. Mosburg—829(L)
Q-value measurements for Al and Cl, D. M. Van Patter, W. C. Porter, and M. A. Rothman—1016
Nuclear Scattering (see **Scattering**)
Nuclear Spectra (see also **Nuclear Reactions; Radioactivity**)
Absolute intensities of L x-rays and γ-ray in RaD decay, Richard W. Fink—266
Angular distribution of γ rays following Coulomb excitation in even-even nuclei, F. K. McGowan and P. H. Stelson—522
Angular distribution of γ rays from Coulomb excitation of Pt and tungsten, W. I. Goldburg and R. M. Williamson—782
β-γ circular polarization correlation measurements: description of method, F. Boehm and A. H. Wapstra—1364(L)
Capture of protons in K^{39}, J. de Veiga Simão and J. P. F. Sellschop—98
Decay properties of Pu^{235}, Pu^{237}, and new isotope Pu^{233}, T. Darrah Thomas, Robert Vandenbosch, Richard A. Glass, and Glenn T. Seaborg—1228
Energy levels in Na^{23} and Ne^{20}, W. W. Buechner and A. Sperduto—1008
Evidence for circular polarization of bremsstrahlung produced by β rays, M. Goldhaber, L. Grodzins, and A. W. Sunyar—826(L)
Excited states in proton $f_{7/2}$ shell, R. D. Lawson and J. L. Uretsky—1369(L)
Fm^{250}, Fm^{251}, Fm^{252} production and properties, S. Amiel, A. Chetham-Strode, Jr., G. R. Choppin, A. Ghiorso, B. G. Harvey, L. W. Holm, and S. G. Thompson—553
Further experiments on β-decay of polarized nuclei, E. Ambler, R. W. Hayward, D. D. Hoppes, R. P. Hudson, and C. S. Wu—1361(L)
γ-ray anisotropy of Co^{60} nuclei polarized by paramagnetic resonance saturation, M. Abraham, R. W. Kedzie, and C. D. Jeffries—165(L)
γ rays from proton bombardment of N^{15}, S. Bashkin and R. R. Carlson—261
Hf^{181} decay, Evan S. Snyder and Sherman Frankel—755
Investigation of γ radiation produced by irradiating B^{10} with protons in energy range 0.7 to 3.0 Mev, S. E. Hunt, R. A. Pope, and W. W. Evans—1013

Isomeric transitions in rare-earth elements, C. L. Hammer and M. G. Stewart—1001
Measurement of longitudinal polarization of positrons emitted by Na^{22}, Lorne A. Page and Milton Heinberg—1220
Nuclear levels in Si^{28} and P^{31}, P. M. Endt and C. H. Paris—764
Parity and polarization of electrons from Co^{60}, H. Frauenfelder, R. Bobone, E. von Goeler, N. Levine, H. R. Lewis, R. N. Peacock, A. Rossi, and G. De Pasquali—386(L)
Pb^{206} energy levels, M. J. Kearsley—389(L)
Photon self-absorption and scattering by 15.1-Mev level in C^{12}, Evans Hayward and E. G. Fuller—991
Positron polarization demonstrated by annihilation in magnetized iron, S. S. Hanna and R. S. Preston—1363(L)
Possible tests of time reversal invariance in β decay, J. D. Jackson, S. B. Treiman, and H. W. Wyld, Jr.—517
Radiative transition widths in $1p$ shell, Dieter Kurath—975
Sb new half-life, H. Bosch and H. Munczek—983
Sb^{119} internal bremsstrahlung and decay scheme, J. L. Olsen, L. G. Mann, and M. Lindner—985
Some new isomeric transitions in rare earth nuclei, J. W. Mihelich and B. Harmatz—1232
Test of neutrino-antineutrino identity, Clyde L. Cowan, Jr., and Frederick Reines—825(L)
Ti^{44} radioactivity, J. R. Huizenga and J. Wing—90
W^{186} and W^{187} radiations, V. S. Dubey, C. E. Mandeville, Ambuj Mukerji, and V. R. Potnis—785

Nuclear Structure Theory (see also **Nuclear Reactions; Nuclear Spectra**)
Diffuse-surface optical model and analysis of elastic scattering of 17- and 31.5-Mev protons, Michel A. Melkanoff, John S. Nodvik, David S. Saxon, and Roger D. Woods—793
Elastic and inelastic scattering of high-energy electrons by some $(2p)$-shell nuclei on intermediate-coupling model, M. K. Pal and S. Mukherjee—811
Elastic scattering of α particles with optical model, W. B. Cheston and A. E. Glassgold—1215
Excited states in proton $f_{7/2}$ shell, R. D. Lawson and J. L. Uretsky—1369(L)
Final-state interactions in total cross section for deuteron photodisintegration, Jeremy Bernstein—791
Fine structure of ground states of N^{15} and O^{17}, Cabell A. Pearse—544
Low-energy neutron scattering by spheroidal complex potential, B. Margolis and E. S. Troubetzkoy—105
Mean square radius of deuteron, J. S. Levinger and M. L. Rustgi—607(L)
Nuclear spin-orbit energy for oscillator wave functions, J. Hope—771
Optical-model analysis of elastic scattering of α particles, G. Igo and R. M. Thaler—126
Pb^{206} energy levels, M. J. Kearsley—389(L)
Radiative transition widths in $1p$ shell, Dieter Kurath—975
Separable nonlocal potential and nuclear saturation, M. K. Sundaresan—1371(E)
Velocity-dependent forces and nuclear structure: I. Central forces, Marcos Moshinsky—117

Optical Instruments (see **Methods and Instruments**)

Optical Properties (see also **Luminescence**)
Absorption coefficients for exciton absorption lines, G. Dresselhaus—76
Determination of optical constants and carrier effective mass of semiconductors, W. G. Spitzer and H. Y. Fan—882
Double transitions in infrared spectrum of solid H_2, H. P. Gush, W. F. J. Hare, Elizabeth J. Allin, and H. L. Welsh—1101(L)
Experiments on photomagnetoelectric effect in Ge, T. M. Buck and F. S. McKim—904
Extreme vacuum uv absorption spectra of AgCl and AgBr films, Charles J. Koester and M. Parker Givens—241
Intensities in inorganic complexes, Andrew D. Liehr and C. J. Ballhausen—1161
M-center spin resonance and oscillator strength in LiF, Norman W. Lord—1100(L)
Opto-electronic properties of HgI_2, Richard H. Bube—703
Oscillatory magneto-absorption of direct transition in Ge, S. Zwerdling and Benjamin Lax—51
Photoconduction in KBr and KI containing F centers, Nicolas Inchauspé—898
Photoelectroluminescence with visible response, D. A. Cusano—604(L)
Primary photocurrent in CdS, P. J. van Heerden—468
Radiative transitions in semiconductors, Henry J. Bowlden—427

Pair Production (see **Electrons and Positrons**)

Phosphors and Phosphorescence (see **Luminescence; Semiconductors**)

Photoconductivity (see **Electrical Conductivity and Resistance**)

Photodisintegration (see **Nuclear Photoeffects**)

Photoelasticity (see **Elasticity and Plasticity**)

Photoelectric Effect (see **Electrical Properties**)

Photography and Photographic Emulsions (see **Methods and Instruments; Optical Properties**)

Photometry (see **Methods and Instruments; Optical Properties**)

Photons (see **Radiation**)

Photovoltaic Effect (see **Electrical Properties; Semiconductors**)

Piezoelectric Effect (see **Dielectrics and Dielectric Properties**)

Plasma (see **Crystalline State; Electrical Conductivity and Resistance; Electrical Discharges; Fluid Dynamics; Statistical Mechanics and Thermodynamics**)

Plasticity (see **Elasticity and Plasticity**)

Polarization, Electrical (see **Dielectrics and Dielectric Properties**)

Polymers (see **Molecular Aggregates**)

Positrons (see **Electrons and Positrons**)

Probability (see **Mathematical Methods**)

Protons (see **Elementary Particle Interactions**)

Quantum Electrodynamics (see also **Field Theory**)
Boson family from quantized finite-particle Maxwell theory, Richard Ingraham and Joseph Ford—1324
Circular polarization of bremsstrahlung from polarized electrons in Born approximation, Kirk McVoy—828(L)
Longitudinal polarization of bremsstrahlung and pair production at relativistic energies, Freeman J. Dyson and Kirk W. McVoy—1360(L)
Photon scattering from protons and deuterons, R. H. Capps—1031
Precision measurement of x-ray fine structure; effects of nuclear size and quantum electrodynamics, Robert L. Shacklett and Jesse W. M. DuMond—501
Proton polarization correction to electron-proton scattering, S. D. Drell and M. A. Ruderman—561
Relativistic corrections to dipole sum rule, J. S. Levinger, M. L. Rustgi, and K. Okamoto—1191
Relativistic radiative transitions, I. P. Grant—754
Spectrum of target bremsstrahlung at small angles, A. Sirlin—637
Sum rules for photodisintegration of H^3 and He^3, M. L. Rustgi—1256
Theory of high-energy bremsstrahlung and pair production in screened field, Haakon Olsen, L. C. Maximon, and Harald Wergeland—27

Quantum Mechanics
Bose-Einstein gas with repulsive interactions: general theory, K. A. Brueckner and K. Sawada—1117
Bose-Einstein gas with repulsive interactions: hard spheres at high density, K. A. Brueckner and K. Sawada—1128
Continued fraction approximants to Brillouin-Wigner perturbation series, R. C. Young, L. C. Biedenharn, and E. Feenberg—1151
Dirac particles in arbitrary external electromagnetic fields, K. M. Case—173(L)
Eigenvalues and eigenfunctions of Bose system of hard spheres and its low-temperature properties, T. D. Lee, Kerson Huang, and C. N. Yang—1135
Extension of WKB equation, Charles E. Hecht and Joseph E. Mayer—1156
Relativistic corrections to dipole sum rule, J. S. Levinger, M. L. Rustgi, and K. Okamoto—1191
Sum rules for photodisintegration of H^3 and He^3, M. L. Rustgi—1256
Theory of rearrangement collisions, Saul T. Epstein—598
Transition from quantum to "classical" partition function, Robert W. Zwanzig—13
Use of general virial theorem with perturbation theory, W. J. Carr, Jr.—414
Quenching of Radiation (see **Radiation**)

Radar (see **Methods and Instruments; Radiation**)
Radiation (see also **Gamma Rays; Range and Energy Loss; X-Rays**)
Angular correlations in two-photon Compton effect, R. B. Theus and L. A. Beach—1249
Circular polarization of bremsstrahlung from polarized electrons in Born approximation, Kirk W. McVoy—828(L)
Evidence for circular polarization of bremsstrahlung produced by β rays, M. Goldhaber, L. Grodzins, and A. W. Sunyar—826(L)
Longitudinal polarization of bremsstrahlung and pair production at relativistic energies, Freeman J. Dyson and Kirk W. McVoy—1360(L)
Photon scattering from protons and deuterons, R. H. Capps—1031
Photon self-absorption and scattering by 15.1-Mev level in C^{13}, Evans Hayward and E. G. Fuller—991
Radiation effects on free oscillations in synchrotrons, Irvin G. Henry—1057
Separation of cross section for scattering of photons by protons into spin-flip and non-spin-flip parts, R. Gomez and D. Walecka—1371(E)
Spectrum of target bremsstrahlung at small angles, A. Sirlin—637
Stark effects in line broadening, Henry Margenau and Marvin B. Lewis—244
Theory of high-energy bremsstrahlung and pair production in screened field, Haakon Olsen, L. C. Maximon, and Harald Wergeland—27
Radio Waves (see **Radiation**)
Radioactivity (see also **Nuclear Spectra**)
Absolute intensities of L x-rays and γ-ray in RaD decay, Richard W. Fink—266
Decay properties of Pu^{235}, Pu^{237}, and new isotope Pu^{233}, T. Darrah Thomas, Robert Vandenbosch, Richard A. Glass, and Glenn T. Seaborg—1228
Fm^{250}, Fm^{251}, Fm^{252} production and properties, S. Amiel, A. Chetham-Strode, Jr., G. R. Choppin, A. Ghiorso, B. G. Harvey, L. W. Holm, and S. G. Thompson—553
Prediction of delayed-neutron precursors, G. R. Keepin—1359(L)
Raman Spectra (see **Molecular Structure and Spectra**)

Range and Energy Loss of Particles (see also **Scattering**)
Plasma losses by fast electrons in thin films, R. H. Ritchie—874
Spatial distribution of energy absorbed from electron beam penetrating Al, F. N. Huffman, J. S. Cheka, B. G. Saunders, R. H. Ritchie, and R. D. Birkhoff—435
Stopping power of some metallic elements for 19.8-Mev protons, V. C. Burkig and K. R. MacKenzie—848
Recombination (see **Molecular Structure and Spectra**)
Rectifiers (see **Electrical Conductivity and Resistance; Semiconductors**)
Relativity and Gravitation
General relativistic red shift and artificial satellite, Banesh Hoffmann—358
Relation of isotopic spin space to space-time, R. L. Ingraham—595
Singular state in relativistic cosmology, Amalkumar Raychaudhuri—172(L)
Violation of parity conservation and general relativity, E. C. G. Stueckelberg—388(L)
Resistance, Electrical (see **Electrical Conductivity and Resistance**)
Resonance Radiation (see **Radiation**)

Scattering, General (see also **Diffraction; Elementary Particle Interactions; Nuclear Reactions; Range and Energy Loss of Particles**)
Collision matrix for rotational excitation in adiabatic approximation, David M. Chase—516
Meaning of solutions of Low's scattering equation, F. J. Dyson—157
Photon scattering from protons and deuterons, R. H. Capps—1031
Polarization of high-energy nucleons scattered by carbon, K. Nishimura and M. Ruderman—558
Theory of rearrangement collisions, Saul T. Epstein—598
Scattering of α Particles (see also **Nuclear Reactions Induced by α Particles and He^3**)
Elastic scattering of α particles with optical model, W. B. Cheston and A. E. Glassgold—1215
Inelastic scattering of 40.2-Mev α particles, G. Igo—256
Optical-model analysis of elastic scattering of α particles, G. Igo and R. M. Thaler—126
Scattering of Atoms and Molecules (see **Atomic and Molecular Beams**)
Scattering of Deuterons and Tritons (see also **Nuclear Reactions Induced by Deuterons and Tritons**)
Diffractional scattering of fast deuterons by nuclei, A. I. Akhieser and A. G. Sitenko—1236
Scattering of Electrons and Positrons (see also **Electrons and Positrons**)
Elastic and inelastic scattering of high-energy electrons by some $(2p)$-shell nuclei on intermediate-coupling model, M. K. Pal and S. Mukherjee—811
Electron-bombardment-induced dissociation of alkalin earth oxides, P. Wargo and W. G. Shepherd—694
Electron scattering from deuteron and neutron-proton potential, John A. McIntyre and Sobhana Dhar—1074
Electron scattering from nonspherical nuclei, B. W. Downs, D. G. Ravenhall, and D. R. Yennie—1285
Excitation of metastable levels in He near threshold, G. J. Schulz and R. E. Fox—1179
He excitation cross sections near threshold, Elizabeth Baranger and Edward Gerjuoy—1182
Plasma losses by fast electrons in thin films, R. H. Ritchie—874
Proton polarization correction to electron-proton scattering, S. D. Drell and M. A. Ruderman—561
Resonance potentials in thin films of KCl, Harold Jacobs, Irving N. Greenberg, Lister Goble, and Alexander Ramsa—921

Spatial distribution of energy absorbed from electron beam penetrating Al, F. N. Huffman, J. S. Cheka, B. G. Saunders, R. H. Ritchie, and R. D. Birkhoff—435
Scattering of Mesons and Hyperons (see also **Mesons and Hyperons; Nuclear Reactions Induced by Mesons and Hyperons**)
Application of dispersion relations to low-energy meson-nucleon scattering, G. F. Chew, M. L. Goldberger, F. E. Low, and Y. Nambu—1337
Chew-theory approach to scattering of low-energy K^+ particles by nucleons, Henry P. Stapp—134
Information obtainable on polarization of μ^+ and asymmetry of e^+ in muonium experiments, G. Breit and V. W. Hughes—1293
Interference phenomena of K^+-meson scattering by nuclei, D. Fournet Davis—816
Relation between scattering and absorption in Pais-Piccioni phenomenon, Myron L. Good—591
Scattering of Neutrons (see also **Nuclear Reactions Induced by Neutrons**)
Analysis of polarization in n-p scattering, Y. Takano and M. H. Hull, Jr.—321
Inelastic scattering of slow neutrons by lattice vibrations in Al, R. S. Carter, H. Palevsky, and D. J. Hughes—1168
Low-energy neutron scattering by spheroidal complex potential, B. Margolis and E. S. Troubetzkoy—105
n-p scattering at 90 Mev, Chung Ying Chih and Wilson M. Powell—539
Scattering of neutrons by spin waves in magnetite, B. N. Brockhouse—859
Slow-neutron scattering by molecules, T. J. Krieger and M. S. Nelkin—290
Thermal inelastic scattering of cold neutrons in polycrystalline graphite, L. S. Kothari and K. S. Singwi—230
Scattering of Protons (see also **Nuclear Reactions Induced by Protons**)
Analysis of proton-nucleus scattering at 9.8 Mev, A. E. Glassgold, W. B. Cheston, M. L. Stein, S. B. Schuldt, and G. W. Erickson—1207
Angular distribution of 424-Mev polarized protons elastically scattered from various nuclei, Edvard Heiberg—1271
$C^{13}(p,p)C^{13}$: experiment and analysis, D. Zipoy, G. Freier, and K. Famularo—93
Diffuse-surface optical model and analysis of elastic scattering of 17- and 31.5-Mev protons, Michel A. Melkanoff, John S. Nodvik, David S. Saxon, and Roger D. Woods—793
Elastic scattering of 40-Mev protons by He^4, Morton K. Brussel and John H. Williams—286
Inelastic proton scattering and (p,d) reactions in heavy elements, Bernard L. Cohen and Sigmund W. Mosko—995
Polarization in p-p scattering at 130, 170, and 210 Mev, E. Baskir, E. M. Hafner, A. Roberts, and J. H. Tinlot—564
Polarization of high-energy nucleons scattered by carbon, K. Nishimura and M. Ruderman—558
Proton-nucleus elastic scattering at 9.8 Mev, Norton M. Hintz—1201
Relativistic corrections to p-p scattering, G. Breit—314
Scattering of Radiation (see **Gamma Rays; Radiation; X-Rays**)
Scintillation Counters (see **Methods and Instruments**)
Secondary Emission (see **Electrical Properties**)
Semiconductors
Determination of optical constants and carrier effective mass of semiconductors, W. G. Spitzer and H. Y. Fan—882
Effect of heavy-doping on self-diffusion of Ge, M. W. Valenta and C. Ramasastry—73
Electron self-energy and temperature-dependent effective masses in semiconductors: n-type Ge and Si, H. D. Vasileff—1372(E)
Excess noise in n-type Ge, James J. Brophy—675
Experimental determination of injected carrier recombination rates at dislocations in semiconductors, J. P. McKelvey—910
Experiments on photomagnetoelectric effect in Ge, T. M. Buck and F. S. McKim—904
Field effect in Ge at high frequencies, H. C. Montgomery—441
Internal field emission in Si p-n junctions, A. G. Chynoweth and K. G. McKay—418
Internal friction and defect interaction in Ge: experimental, J. O. Kessler—646; theoretical, J. O. Kessler—654
Investigation of photoconductive effect in PbS films using Hall and resistivity measurements, Joseph F. Woods—235
Lifetime of carriers in PbS crystals, Wayne W. Scanlon—718
Nuclear polarization and impurity-state spin relaxation processes in Si, David Pines, John Bardeen, and Charles P. Slichter—489
Oscillatory magneto-absorption of direct transition in Ge, S. Zwerdling and Benjamin Lax—51
Precipitation of Cu in Ge, A. G. Tweet—221
Radiative transitions in semiconductors, Henry J. Bowlden—427
Surface states on Si and Ge Surfaces, H. Statz, G. deMars, L. Davis, Jr., and A. Adams, Jr.—455
Shock Waves (see **Fluid Dynamics**)
Solid State (see **Crystalline State**)
Solutions (see **Liquids**)
Sound (see **Acoustics**)
Spallation (see **Nuclear Reactions**)
Spark Discharge (see **Electrical Discharges**)
Specific Heat (see **Thermal Properties**)
Spectra, Atomic (see **Atomic Structure and Spectra**)
Spectra, General
Stark effects in line broadening, Henry Margenau and Marvin B. Lewis—244
Spectra, Molecular (see **Molecular Structure and Spectra**)
Spectra, Nuclear (see **Nuclear Spectra**)
Spectroscopy Technique (see **Methods and Instruments**)
Spinor Fields (see **Field Theory**)
Standards (see **Constants, Standards, Units**)
Stark Effect (see **Atomic Structure and Spectra**)
Statistical Mechanics and Thermodynamics
Bose-Einstein gas with repulsive interactions: general theory, K. A. Brueckner and K. Sawada—1117
Bose-Einstein gas with repulsive interactions: hard spheres at high density, K. A. Brueckner and K. Sawada—1128
Connection between pair density and pressure for a Bose gas consisting of rigid spherical atoms, M. Fierz—412
Correlation energy of electron gas at high density, Katuro Sawada—372
Correlation of electron gas at high density, Murray Gell-Mann and Keith A. Brueckner—364
Eigenvalues and eigenfunctions of Bose system of hard spheres and its low-temperature properties, T. D. Lee, Kerson Huang, and C. N. Yang—1135
Ground-state energy of hard-sphere gas, F. J. Dyson—20
Information theory and statistical mechanics, E. T. Jaynes—620
Specific heat of degenerate electron gas at high density, Murray Gell-Mann—369
Statistical mechanical theory of transport phenomena in fully ionized gas, Wesley E. Brittin—843
Stochastic basis of Eulerian variational principle in linear dissipative processes, Armand Siegel—609
Theory of equation of state and ultrasonic absorption in associated liquids at ordinary temperatures, R. E. Nettleton—631

Statistical Mechanics and Thermodynamics (Continued)
Thermodynamic properties of liquid He^3: vapor pressures below 1°K, Stephen G. Sydoriak and Thomas R. Roberts—175
Thermodynamics for elastic solids: general formulation, Tsuan-Wu Ting and James C. M. Li—1165
Transition from quantum to "classical" partition function, Robert W. Zwanzig—13
Transport equation in quantum statistics for spinless molecules, A. W. Sáenz—1371(E)
Statistical Methods (see **Mathematical Methods**)
Strange Particles (see **Elementary Particle Interaction; Mesons and Hyperons**)
Superconductivity
Evaluation of some nonlocal theories for thin superconducting film, J. R. Schrieffer—47
Further ultrasonic experiments in superconducting polycrystalline Sn, L. Mackinnon—70
Microscopic theory of superconductivity, J. Bardeen, L. N. Cooper, and J. R. Schrieffer—162(L)
Paramagnetic effect in superconductors: IV. Measurements on Al, A. H. Fitch and Hans Meissner—733
Study of superconducting Hg by nuclear magnetic resonance techniques, F. Reif—208
Superconducting properties of Re, Ru, and Os, J. K. Hulm and B. B. Goodman—659
Thermal conductivities of pure metals at low temperatures: Hg, R. T. Webber and D. A. Spohr—927
Supersonics (see **Fluid Dynamics**)

Thermal Conductivity (see **Thermal Properties**)
Thermal Diffusion (see **Diffusion**)
Thermal Expansion (see **Thermal Properties**)

Thermal Properties
Energy of formation of vacancies in Cu and Au, P. Jongenburger—'66
Specific heat of degenerate electron gas at high density, Murray Gell-Mann—369
Thermal and electrical resistivity of Tl at low temperatures, Gaston Fischer, G. K. White, and S. B. Woods—480
Thermal conductivities of pure metals at low temperatures: Hg, R. T. Webber and D. A. Spohr—927
Thermal Radiation (see **Radiation**)
Thermionic Emission (see **Electrical Properties**)
Thermodynamics (see **Statistical Mechanics and Thermodynamics**)
Thermoelectric Effect (see **Electrical Properties; Semiconductors**)
Thermoluminescence (see **Luminescence**)
Thermomagnetic Effect (see **Magnetic Properties**)
Total Cross Sections (see **Electrons and Positrons; Nuclear Reactions**)
Transmutation (see **Nuclear Reactions**)

Uncertainty Principle (see **Quantum Mechanics**)
Units (see **Constants, Standards, Units**)

Vacuum Tubes (see **Methods and Instruments**)
Van der Waals Forces (see **Molecular Structure and Spectra**)
Viscosity (see **Liquids**)

Wave Mechanics (see **Quantum Mechanics**)
Work Function (see **Electrical Properties**)

X-Rays
Precision measurement of x-ray fine structure; effects of nuclear size and quantum electrodynamics, Robert L. Shacklett and Jesse W. M. DuMond—501
